

peco[®]

AN EXELON COMPANY

Your home uses more energy in the winter.

Cold weather means your heating system has to work harder to keep your house comfortable.

**Did you know heating
alone can account for 40%
of your usage?***

PECO offers tools to help you save and manage your energy use—all in one place:

peco.com/Winter

**Heating and air conditioning are the largest source of energy consumption in most homes. These uses are mostly seasonal and are energy-intensive.*

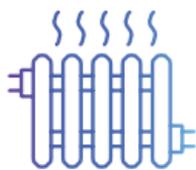

Start managing your energy today.

PECO provides ways to manage your energy bill when the weather cools down.

Energy-savings programs like the Home Performance audit.

Usage insights, like the What Uses Most tool.

Payment options, like Budget Billing.

Resources to help you use energy more efficiently or access energy assistance.

Take control of your energy and save this Winter:
