

Seal, Save and Get Comfy

Find home comfort and high efficiency for the hotter months ahead — with PECO.

What you can expect from a PECO Home Energy Assessment:

- **Exclusive rebates** for upgrades
- **Expert advice** from a PECO Energy Advisor
- A **personalized report** with tips and strategies that can save you up to 20% annually
- **Free** energy-saving products like LEDs and smart power strips

Schedule yours today. Visit peco.com/Assessment or call **888-5-PECO-SAVE** (888-573-2672).

What your neighbors are saying about their PECO Home Energy Assessments:

"The advisor offered tips, suggestions, resources and replacement bulbs to help me be even more efficient. He was patient and answered all my questions. I'd recommend the PECO Energy Assessment to family and friends." – **Kathleen M., Homeowner in Bluebell, PA**

Your energy. Your choice.

Manage costs by monitoring supply charges.

The electricity used by customers—the supply charge—makes up about half of your total bill. PECO updates this charge, which is included in the Price to Compare (PTC), in June and December as market prices change.

The PTC is the price you can use to evaluate offers from competitive energy suppliers, and the charges are passed along directly to you at the exact cost PECO pays. PECO's PTC can be found in the Message Center on your bill. You can also find this information at peco.com/Choice.

As the seasons change, we encourage you to monitor your energy usage and take advantage of PECO's energy efficiency programs.

Be Prepared for Summer Storms

Stay safe and informed—before, during and after severe weather.

Before

- Sign up for weather and outage updates at peco.com/Alerts.
- Check out peco.com/Storm for updates.
- Download the PECO Mobile App and sign up for text alerts.

During

- Report any outages to PECO immediately—by calling **800-841-4141** or through the PECO Mobile App.

After

- Our crews may be working in your area after the storm has passed. It can take several days to restore service to every customer. Check out peco.com/Storm for updates.

*If you have a medical condition, you should make plans for backup power or alternate accommodations in the event of an extended power outage. Those in need of immediate medical assistance should call 911.

Keep Your Cool

AC maintenance and the right window coverings can help you save money this summer.

Air Conditioning

- Air conditioning accounts for **13% of total home energy expenses on average**. Make sure yours is the right size for your home or room (if you're using a window or wall unit).
- **Clean or replace air conditioner filters** once a month or as recommended by your HVAC contractor. It can lower your air conditioner's energy consumption by 5-15%.

Window treatments

- **Consider Cellular Shades:** In cooling seasons, cellular shades can reduce unwanted solar heat through windows by up to 60%, reducing the total solar gain to 20% when installed with a tight fit.
- **Choose draperies with heat reduction in mind:** Studies demonstrate that medium-colored draperies with white-plastic backings can reduce heat gains by 33%.
- During summer days, **close draperies on windows receiving direct sunlight** to prevent heat gain.
- **Window awnings** can reduce solar heat gain in the summer by up to 65% on south-facing windows and 77% on west-facing windows.

Plan Ahead:

Electrical Safety@HOME

Planning a large project, like replacing the roof or siding on your home? Make safety a priority, especially around aerial power lines.

- If you need to work around aerial power lines, contact PECO New Business Services at 800-454-4100 at least 14 days in advance.
- For some projects, depending on the overall scope, additional lead time may be required, especially if construction occurs within seven feet of an aerial wire. Contractors need to inform PECO six to eight weeks in advance as poles and wires may need to be relocated.
