## 2" x 1-1/2" End Suction Centrifugal Pump

Made with high quality investment cast 316 stainless steel components, the ChemFlo® series of pumps are designed to be applied in a wide range of pumping applications where stainless steel is required.

ChemFlo® 4 pumps utilize a semi-open impeller design to allow for passage of larger solid sizes. Several seal options are available in addition to the standard type 2100 carbon / ceramic / Viton mechanical seal.

ChemFlo® 4 pumps are offered in two configurations, pump (with motor) and PumPAK® (without motor) versions. Motors available are 56C and 145TC. If ordering a PumPAK for a 145TC motor please note that the electric motor must have a base.
