PETROLEUM 700

4" x 3" End Suction Centrifugal Pump

The Petroleum 700 End Suction Centrifugal Pump is engineered for superior performance in transferring petroleum-based liquids efficiently.

Built for compatibility with 256JP frame electric motors, the Petroleum 700 line also supports alternative mounting configurations such as pedestal setups and PumPAKs®. Its design allows the pump to be rotated in 90° increments, delivering outstanding versatility and dependable operation across a wide range of industrial uses.

Durability and advanced engineering define the Petroleum 700 series. The SE 700 features an enclosed cast iron impeller, the SG 700 incorporates an enclosed aluminum impeller, and the SO 700 is equipped with an enclosed cast iron impeller. These robust materials ensure long service life, even under demanding conditions.

The Petroleum 700 Pump is available in three distinct models: SE, SG and SO:
