

TIMER DRAINS

TEC-44

A powerful workhorse for applications with a high level of condensate contamination.

The TEC-44 is a powerful timer drain controlled by a motorised ball valve, designed to remove condensate from deliquescent dryers, tanks, vessels and refrigerated dryers. The TEC-44 is designed to remove heavy contaminated condensate up to pressure ratings of 40 bar. This condensate drain cannot be blocked and is applied where all else fails. Draining applications with a high level of contamination (rust, scale etc.) require the TEC-44. The TEC-44 is impossible to block due to its powerful ball valve rotation and large orifice.

Product benefits:

Heavy duty

Fail-Safe
