

# MAXIMUS VIEW

A NEW Monitoring Solution  
for Your Business at an  
Affordable Price!

Smart  
Monitoring

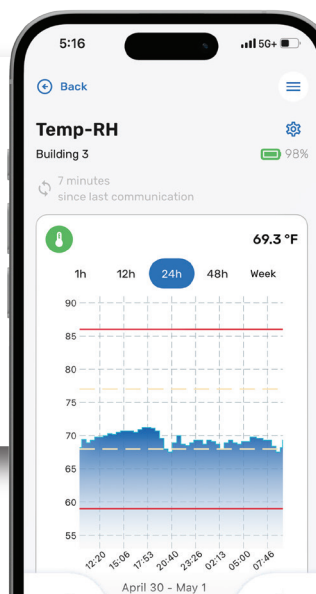

Using the LoRaWan® technology designed for remote monitoring, **MAXIMUS View** is a smart monitoring ecosystem that provides information on environmental metrics through wireless sensors and a gateway.

Thanks to long-range communication and low power consumption, **MAXIMUS View** is the perfect solution for your monitoring needs.

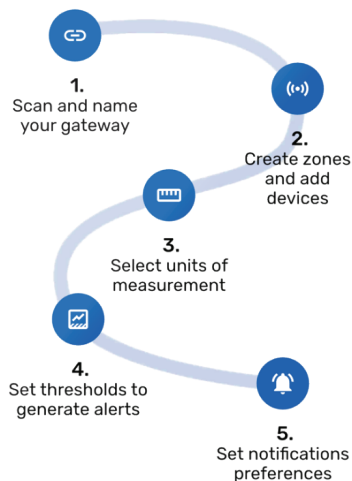

Whether on your smartphone or your tablet, these data points are all found in a single app and help ensure that every metric is within the correct range to keep the best environment for your animals, plants, products, etc.

Get ready for a radical change!

# MAXIMUS VIEW

Set up your **MAXIMUS View** application quickly in **5 easy steps**.
