

Construction Worker

Supporting modernization and maintenance of one of the largest electrical systems in the nation!

Provide support on construction, repair and maintenance of the transmission and distribution systems. Candidates interested in these roles will go on to become cable splicers, or may support ongoing modernization of the grid as team members in substation construction or overhead. This position is the entry point to either the Substation, Underground or Overhead apprenticeship training programs.

Must Haves:

- Valid Drivers License and ability to obtain CDL A Permit
- High School Diploma or equivalent

Good to Have:

- Utility Training Certificate, Trade or Climb School Certificate
- Military, Construction or Skilled Trade Experience
- Commercial Driver's License (CDL) Class A

Required Tests and Training:

- Construction and Skilled Trade (CAST) Test
- CAST Test Practice Test ([Link](#))
- Construction Physical Assessment Test (PAT)
- Construction Physical Assessment Test Video ([Link](#))
- 4-week Construction Worker Initial Training (paid)
