Make your electric vehicle goals more affordable today.

By adding a Level 2 charger to your home, you can:

- Charge an EV conveniently at home—up to eight times faster than from a wall outlet
- Gain control, and convenience, of charging at home, especially during extreme temperatures
- Increase your home's value and appeal
- Get up to a $2,500* rebate from ComEd—look inside to learn more!

Ready to get started?

Find a contractor within our EV Service Provider (EVSP) network to install your EV charging equipment. To learn more, visit: **ComEd.com/EVCharging**

Electric Vehicle Charger and Installation Rebates

Up to a $2,500* rebate on Level 2 EV charging equipment and installation costs

Charge at home, while you sleep.

New rebates from ComEd can help you afford faster and convenient home EV charging.

Electric vehicles (EVs) are becoming more affordable every year. In fact, many EVs now cost less to run over the lifetime of a vehicle than gas-powered cars. The EV future is here, and there is no better time than now to prepare by adding a home-charging solution.

With a focus on enabling Illinois' goal of 1 million electric vehicles by 2030, ComEd is working to empower communities with access to faster, smarter and more convenient EV charging.

**Program rebates are limited and will be provided to customers on a first-come, first-served basis according to the completed application date and relevant eligibility criteria until funds are exhausted at the end of the program term or December 31, 2026, whichever comes first. Significant funding is reserved for customers who meet certain requirements. Restrictions apply; refer to full program details and set of program requirements in the program's Terms & Conditions.*

Why EV and Level 2?

EVs don't require gas and have lower maintenance costs over time. With zero tailpipe emissions, EVs are healthier for both your family and the environment.

EVs do have to be charged—and charging from a standard wall outlet can take a day or more. However, when you install a Level 2 charger, you can charge an EV up to eight times faster—from empty to full overnight, or sooner.

Access our online EV toolkit at **ComEd.com/EV** to learn about EV charging, savings, tax incentives and EV resources near you.

Getting your charger and rebate.

By applying, ComEd customers may be eligible to:*

- Receive a rebate of up to $2,500* for installing a Level 2 charger at home
- Get connected with a reliable, certified contractor in your community to install your charger

Eligibility Requirements

- Rebates are available for "smart" (i.e., Wi-Fi-enabled) Level 2 EV chargers purchased on or after February 1, 2024. Applications must be submitted within 90 days of charger installation (some restrictions apply regarding the installation date; see the program Terms and Conditions and program page for more information).
- Single-family and multi-family property tenants who have a residential ComEd account qualify for rebates. For commercial accounts, refer to the **EV Make-Ready Rebate Program**.
- Customers must enroll in a time-variant supply rate offered by ComEd or by an Alternative Retail Electric Supplier and remain enrolled for a minimum of three years.
- Customers who meet certain criteria are eligible to receive the Low Income/Equity Investment Eligible Community Rebate,* the highest rebate available.

ComEd rebates make the switch to an EV more affordable!
