Charge at home, while you sleep.

New rebates from ComEd can help you afford faster and convenient home EV charging.

Electric vehicles (EVs) are becoming more affordable every year. In fact, many EVs now cost less to run over the lifetime of a vehicle than gas-powered cars. The EV future is here, and there is no better time than now to prepare by adding a home-charging solution.

With a focus on enabling Illinois' goal of 1 million electric vehicles by 2030, ComEd is working to empower communities with access to faster, smarter, and convenient EV charging.

*Rebates are limited and will be provided to customers on a first-come, first-served basis according to the completed and error free application date and relevant rebate qualification criteria. Significant funding is reserved for eligible customers. Restrictions apply; refer to full program details and set of program requirements in the Program's Terms & Conditions.

Why EV and Level 2?

EVs don't require gas and have lower maintenance costs over time. With zero tailpipe emissions, EVs are healthier for both your family and the environment.

EVs do have to be charged—and charging from a standard wall outlet can take a day or more. However, when you install a Level 2 charger, you can charge an EV up to eight times faster—from empty to full overnight, or sooner.

Access our online EV toolkit at [ComEd.com/EV](https://www.comed.com/EV) to learn about EV charging, savings, tax incentives and EV resources near you.

Getting Your Charger and Rebate

By applying, ComEd customers may be eligible to:*

- Receive a rebate of up to \$3,750* for installing a Level 2 charger at home.
- Get connected with a reliable, certified contractor in your community to install your charger.

Eligibility Requirements

- Rebates are available for "smart" (i.e. wifi-enabled) Level 2 EV chargers purchased on or after February 1, 2024. Applications must be submitted within 90 days of charger installation.
- ComEd customers who live in a single-family home or multi-family home with two units or less may qualify to participate. An active ComEd residential account number, where the equipment is installed, is required to receive a rebate.
- Customer must enroll in a time-variant supply rate offered by ComEd or by an Alternative Retail Electric Supplier and remain enrolled for a minimum of 3 years.
- The highest rebates are available to eligible customers*.
