Vent latch, when deployed, will limit sash travel to allow for ventilation.

Fusion-welded corners prevent air from passing through and boost structural support.

Cam lock has a durable zinc-cast design that pulls sashes and mechanical interlock tightly together to prevent air infiltration.

FlexScreen with a cutting-edge, PVC-coated, high-performance spring steel frame. Hides in the window screen pocket to improve sightlines.

AIR INFILTRATION

Poorly designed windows don't have built-in airlocks, weatherstripping, and barriers necessary to keep air from forcing its way in, and leaky windows cause drafty homes. ULTRAVISION windows greatly minimize air leaks with numerous air barriers designed into our advanced sill design. The Ultravision's narrow manufacturing tolerances produce a tight window that prevents air infiltration.
