

An Ingersoll Rand Business

Grayling™ Bulk Packaging for Dry and Liquid Applications

DRIVE YOUR MANUFACTURING EFFICIENCY WHILE PROTECTING YOUR PRODUCT

Customized form-fit liners for liquid and dry applications enhance efficiency, are available in unique shapes and a broad range of high-performance films and can be delivered with special valves or attachments.

Customized form-fit liners for liquid and dry applications

Efficient

- Improves fill/transfer/dispense operations

Custom solutions

- Non-traditional shaped liners
- Special valves or attachments
- Broad range of films

Xtrakt®- Innovative higher viscosity discharge system

- Patented liner/drive mechanism
- Saves money by dramatically reducing residual
- Improves safety – no awkward liner lifting
- Reduces discharge time

Products:

- Dry Liners
- Liquid Liners
- Drum Liners

Our production facility is FSSC22000, Kosher and IMS certified

Intermediate Bulk Packaging Solutions for Liquid & Dry Applications

LIQUID

Designed to optimize your filling and dispensing process

- Barrier films available for oxygen and moisture sensitive applications
- We offer liners with a broad portfolio of fill and dispense fitments to optimize your processing
- A wide range of accessories available (heating pads, fill bridges, adapters and valves)

LIQUID FORM-FIT LINERS

Form-fit liquid liners are designed to reduce labor while minimizing waste and product residual during filling and dispensing bulk liquids. The form-fit design allows for a consistently complete fill and dispense of products because the liner has no pleats, folds or other traps to hinder material flow.

PILLOW LINERS

Liquid pillow liners are an economical packaging choice for liquid bulk materials in IBCs. The pillow style IBC liner protects liquid products from contamination and leakage during processing, storage and transportation.

DRY

Designed for your demands

- Liners are manufactured with film structures for your specific application performance needs; moisture or oxygen barrier, UV inhibition, toughness and durability, anti-static properties (L2)
- Form-fit liners can be made with attachment tabs which allow you to sew, tie or glue in the liner eliminating the chance of liner discharge

DRY FORM-FIT LINERS

Form-fit liners are custom designed to fit the dimensions of the FIBC providing maximum filling and dispensing efficiency through complete discharging of your product.

DRUM LINERS

Drums, liners ensure that your products stay pure and contamination free. Our drum liners are manufactured using engineered polyethylene film structures to provide durability, consistency and performance.
