

# SENTINEL XT CLEAR™

# WELL-SUITED FOR PHARMA

## WELL-SUITED FOR SAFETY

ILC Dover designed the spacesuits for the Apollo mission, and we continue to outfit the current generation of astronauts. All of that experience and expertise goes into our Sentinel XT Clear™ powered air-purifying respirator, designed especially for the pharmaceutical industry.

ILC Dover's Sentinel Clear™ Hood, combined with its XT blower, is a best-in-class powered air purifying respirator (PAPR) that delivers an Assigned Protection Factor (APF) of 1,000 for a full 12 hours of operation. It's the clear choice for pharma in-house manufacturing and contract manufacturing organizations that must safeguard employees from airborne particles, cleaning solvents, and bioactive ingredients.

The Sentinel XT Clear system is the only PAPR that offers a clear hood engineered with advanced film technology for excellent visibility, comfort, and missioncritical protection. Think of it as a spacesuit for pharma.

## WELL-SUITED FOR PRODUCTIVITY

The Sentinel XT Clear PAPR is a superior solution when compared to other PAPR masks and facepieces. It offers a full 320-degree field of view, allows the wearer to have facial hair and/or a head covering, and reduces feelings of claustrophobia.

## **SMART SYSTEM DESIGN**

Multiple filter and breathing tube options ensure that the assembly is easy to use and supports a range of applications.

### STRONG, LIGHTWEIGHT BLOWER

The XT blower, when paired with ILC Dover's lithium polymer battery, weighs just 2.2 pounds, yet delivers 8+ CFM airflow, exceeding NIOSH requirements. A nonincendive configuration is available for use in hazardous locations.

#### IMPROVED ERGONOMICS

Our back harness and Quick-Loc™ belt options support a range of user needs and preferences while increasing comfort and usability.

# **WELL-SUITED**

# FOR PHARMA

ILC Dover may not be a household name in the pharmaceutical industry, but discerning manufacturers have trusted our products for years, both for containment and for personal protection. We've earned this trust by designing highly engineered solutions that perform reliably when failure is not an option. Explore below to see how the Sentinel XT Clear<sup>TM</sup> system is well-suited for pharma.

# **TECHNICAL SPECIFICATIONS**

SENTINEL CLEAR HOOD	
Assigned Protection Factor	1,000
Field of View	320 degrees
Configuration/design	Inner and outer bibs for easy donning and protection from breach — unique skirt/exhaust system inflates suit to deliver improved protection and comfort
Material	Non-woven, spunbond, polyethylene coated, polyolefin and polyethylene film
Lens Material	Polyester film (PET)
Sizing	Universal
Standards	NIOSH-approved
SENTINEL XT BLOWER/BATT	ERY
Motor	Brushless, no-spark design, with a high torque- to-weight ratio for greater operating efficiency
Battery Composition	Lithium polymer
Battery Life	12 hrs
Battery Mount	Direct snap-on to blower
Weight	2.2 lbs
Airflow	8 scfm (230 lpm)
Noise Level	<75 dB
Indicators	External battery life indicator gauge shows charge level
Cartridge Interface	40 mm rolled threads — integration with integral blower gaskets
Standards	XT/NI system is Factory Mutual Global Group approved for service in Class I, II and III, as well as in Division 2, Group C, D, E, F and G hazardous locations
FILTERS	
Particulate Protection	P100/HEPA cartridges
Organic Vapor and Acid Gas Protection	OV/AG/HE cartridges
Additional Protections	Multi-hazard cartridges provide protection agains ammonia, methylamine, formaldehyde, chlorine, sulfur dioxide, hydrogen chloride, chlorine dioxide and hydrogen fluoride
Attachment	40 mm
ACCESSORIES	
Breathing Tube	19 inch extendable flexible breathing tube — available with disposable breathing tube cover
Battery Charger	Charging cradle/charger
Flowmeter	Easy-to-use flowmeter to test airflow
Ergonomic Options	Quick-Loc decon belt is easy to use and clean — adjustable back harness ideal for

# **NEW** - 19" EXTENDIBLE, FLEXIBLE BREATHING TUBE

- One size fits all Extendable from 19" fully compressed to 48" completely extended.
- Completely flexible, lays flat.
- Made using thermoplastic polyurethane allowing for pliability so the tube can move with you during rigorous processes.
- Disposable breathing tube covers can be installed for easy cleaning.
- Latex Free and hypoallergenic
