CEMENT STATIONARY P857 BLOWER

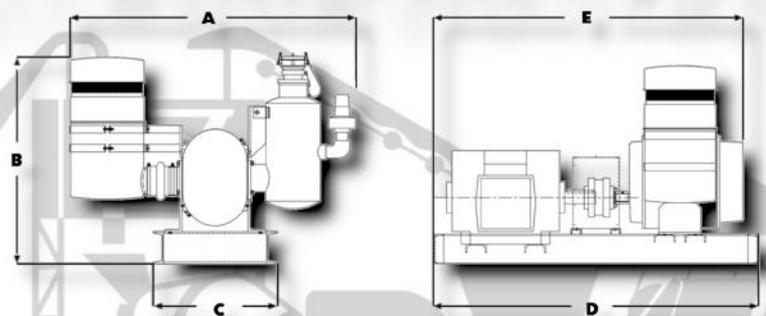

Built Specifically For Bulk Cement Pigs And Mobile Cement Plants

The P857 Blower is considered by many, one of the quietest blowers on the market. This stationary system will efficiently offload presurized cement pigs and has been designed specifically for powdered cement.

The blower includes a 3" Check Valve and Camlock Assembly with a 16 PSI Relief Valve, and a 6" Pre Cleaner in the suction side ensuring clean air intake.
