Excess Generation is paid out only upon closure of this account.

Net Metering Excess Generation Accrual Method Election (select one)

12 – Month Accrual _____

OR

Indefinite Accrual _____

(Annual Pay Out Option)

(No Annual Pay Out Option)

Excess Generation is paid out based on the account balance after the April meter reading.

Excess Generation is paid out only upon closure of this account.

The default method is the 12-Month Accrual method unless the Indefinite Accrual method is selected. Once a customer elects Indefinite Accrual, the customer must wait 12 months before being able to switch to 12-Month Accrual. Under both methods, excess generation will offset future usage until pay out is triggered based on the method selected on this form. Excess generation is paid out to the customer at the rate charged for the electricity commodity only, exclusive of distribution, transmission, or other non-commodity charges.

CUSTOMER – Please complete the following section **ONLY** if you are choosing to have a third-party representative make this selection.

I authorize the following person to make changes to the excess generation accrual method election for this account on my behalf.
