PODS Storage Checklist

Convenient storage starts with this handy checklist. Whether you're keeping your container at home, at one of our secure Storage Centers, or both, PODS has everything you need to make storage easier than ever.

Packing

- Pack your valuables and essentials separately and plan on keeping these items with you.

- Label your boxes and, when possible, use clear plastic containers to easily see what's inside.

- If you have more than one container, make sure to note each container's serial number and the items placed in each.

- Use specialty boxes designed with dividers for crystals, china, and glassware. Label these boxes as "FRAGILE."

- To help protect your belongings, fill empty spaces in boxes with packing paper or peanuts.

- Protect your appliances and furniture by placing moving blankets between pieces to prevent scratches.

- Hang clothes on non-rusting hangers, zip tie them into groups, and pack them in garment bags — or make your own with a garbage bag.

- Save space by using dresser drawers to store smaller items.

- Leave appliance doors slightly open to prevent mildew.

- If you're storing wool items, use cedar chips or mothballs to prevent damage from moths.

Getting started

- Make sure to get any required permits, and check your homeowner association guidelines if needed.

- Before your PODS container is delivered, speak with our Customer Care team about your preferred placement. We'll guide you to where it can and can't be placed.

- Use the PODS Moving & Storage Calculator. Tell us how much stuff you have, and we'll estimate the number of containers you'll need.

- Make an inventory list of everything you'll be storing in your container.

- Have your packing and loading supplies ready. This can save you time and help protect your belongings.

- Review your Rental Agreement for a list of prohibited items so you're aware of what can't go in your container.
