

FDA compliant pumps for the beverage industry

Our new SD line features the Quick Knock Down (QKD) compression clamp system to facilitate easier cleaning, service and maintenance, which promotes reliability and long product life

ARO® FDA compliant pumps are the reliable and efficient solution for high-volume transfer and dispensing applications. As an expansion of the EXP Series of dual diaphragm pumps, ARO® now offer a reliable choice for sanitary applications.

Electropolished stainless-steel 316L construction materials help ensure product purity and easy clean out. QKD design facilitates rapid disassembly (and re-assembly) of components for inspection and maintenance—in place or out of place—and right back into service.

Better overall performance, low material shear ARO® EXP Series design yields 20-30% better flow rate than competitors and ensures the material is transferred unharmed.

- User Friendly
- Dead head capabilities
- Self-priming
- No electricity
- No mechanical seals
- Shear sensitive pumping
- Wide flow and pressure range
- Self adjusting flow based on pressure
