

SUPERIOR, VERSATILE, MORE ECONOMICAL

NEW

AIRDRIVE™

BY APSCO

**BOLDER.
LIGHTER.
BETTER.**

APSCO's dry bulk conveyance system*, the AirDrive™, offers greater efficiency and flexibility in the dry bulk market, with a dramatically quieter unit and much easier installation. By eliminating the driveshaft, it can also be placed outside the frame rail or behind the cab, marking a shift away from older, more restrictive systems.

**PATENT PENDING*

- Increased Hauling Capacity
 - Lower Weight
- Significantly Quieter
- Flexible Mounting
- 30% More Efficient
- Faster Install Time
- Hydraulic Drive
- Better Performance

NEXT-LEVEL RESULTS

The AirDrive™ by APSCO is remarkably smaller and lighter, resulting in greater hauling capacity, lower fuel consumption, and an overall improvement of fleet operations. With the addition of hydraulics, trucks are available for other product hauling opportunities such as liquid bulk and walking floor trailers, increasing the return on your truck investment.

MAXIMUM VERSATILITY

The AirDrive™ by APSCO is making advancements on the systems of the past with incredible benefits, one of the greatest being, the ability to mount the system wherever is most practical—no longer bound by the restrictions of the past.
