INDUSTRIAL BLOWER SERVICES

KEEPING YOUR BUSINESS MOVING

Repair & servicing | Reconditioning | Hire | On Site Services

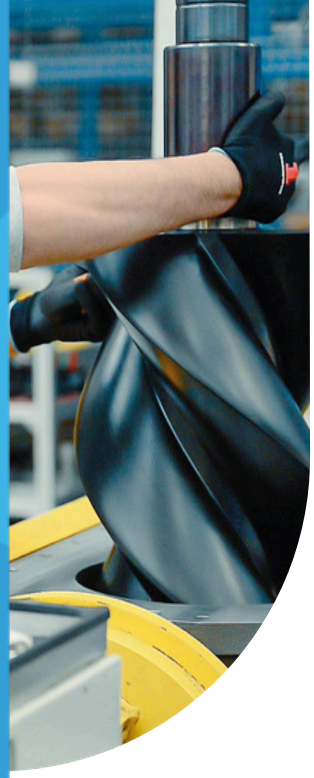

LOBE | SCREW | CLAW | CENTRIFUGAL | TURBO | SIDE CHANNEL | LIQUID RING

Experienced and responsive support to keep your business moving.

Offering industry knowledge that is second to none.

At IBS we work closely with blower and vacuum manufacturers, constantly monitoring advances in technology and tailoring our service to provide the best possible support and maintenance for your business.

With faltering machinery our experienced staff analyse and advise the most cost effective and rapid solutions that best fit you. We strive to keep your systems and production lines running smoothly and provide quick response to emergencies.

INDUSTRIAL BLOWER SERVICES

REPAIR, SERVICING AND RECONDITIONING

Old or new, we repair, service and recondition a large range of industrial equipment. Ranging from roots, screw, turbo, side channel and centrifugal blowers; vacuum pumps (liquid ring and vane types); portable vacuum units.

HIRE EQUIPMENT

We have the largest modern fleet of hire equipment readily available for long or short term hire, providing temporary support in both planned and emergency situations. Equipment available includes blower sets, bare shaft blowers, vacuum pumps and portable vacuum units.

ON SITE SERVICES

Our experienced team of engineers and technical sales staff are here to provide support and on site services in process engineering, biogas booster services, site surveys, energy audits, fault finding and site visits. A fleet of vehicles including HIAB equipped flatbeds are also ready for speedy transport, handling and on site support.
