Benefits

Single pump System:

- Excellent & reliable priming.
- Excellent line clearing, no compromise on partial or full load transfers.
- No separate priming system or wearing priming pump.

Simple to Use:

- Easy to navigate system menus with intuitive operator sequences to help guide through the system without needing extensive training.
- GPS Location Initialisation.

Fuel Save Technology:

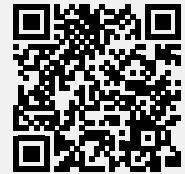

- Fully integrated engine interface, fully automatic with no driver input.
- Stop & starts engine to suit pump requirement, eliminates fuel wastage at farm.
- Controls engine speed to suit pumping operation.
- Reduces whole life vehicle costs

Compliant Data Transfer:

- 'Live' collection files or full shift file transfers.
- Data formats to suit existing customer needs.
- Automatic data collection imports.

Service & Backup:

- On board system running diagnostics.
- Easily exchanged system modules.
- 12 GD van based mobile service engineers.
- Option level Service Programs from on-truck annual calibrations to full R & M Contracts.

Modular design, easy to install trucks

Semi intelligent Auto-sampler

Integrated 'Fuel Save' auto STOP/START system

Sample pot Bar Code Printing system
