Welcome to IRTS

Ingersoll Rand's Transport Solutions (IRTS) has been formed to set the precedent for innovation in the age of alternative fuels.

Our world is changing, with more sophisticated, intelligent, automated, and electrified transport solutions paving the way for a greener, brighter, and more convenient future. This brings fresh new challenges for our customers who need a partner to guide them through this new landscape.

As a business operating at the heart of sustainable transportation, we must also evolve in order to continue to be that partner.

That's why we have brought together our key strategic brands under the umbrella of IRTS, an innovation-led vehicle-mounted transport solutions and fuel systems specialist. While Gardner Denver Transport Solutions, GHH RAND®, EMCO Wheaton, TODO, Robuschi and HIBON continue to lead their respective markets and be at the forefront of our communications, they will do so with the strength, ideas, and financial scale of the IRTS brand behind them, pioneering tomorrow's solutions with the unrivalled knowledge and expertise we have today.

Our brands are synonymous with innovation. As the transport market continues to change, IRTS is taking its place at the forefront of evolution.

Our Mission

Our strategic brands are synonymous with innovation.

Our strategic brands are synonymous with innovation. Our ambition for IRTS is to retain existing customer relationships and build new ones which take our business and its brands into the world of future sustainable transportation, further broadening our reach, market position and product portfolio.

We are here to make life better for our customers, our partners, ourselves, and our planet. To achieve this, we must work closely with our brands to design, develop and deliver to market the latest innovations in future transportation, aiding the creation of more sustainable and effective mobility solutions.

We're embracing our entrepreneurial spirit and bringing innovation back to the heart of what we do. To be the partner helping our customers take on the challenges they face – as we move into a world of new fuel technologies and new industry standards.

We have brands renowned for their history of ingenuity, their smart engineering and industry-leading global service network. Our customers will continue to expect this from us in the future. Therefore, we need to become the innovators once more.

To make life better for our customers, our partners and ourselves.

Our Vision

D3: "Design. Develop. Deliver."

Our vision for IRTS is to retain existing customer relationships and build new ones which take our business and its brands into the world of future sustainable transportation, further broadening our reach, and market position.

We are here to make life better for our customers, our partners, ourselves, and our planet. To achieve this, we must work closely with our partners through our D3 initiatives - **Design, Develop and Deliver** to market the latest partners in future transportation, aiding the creation of more sustainable and effective mobility solutions. That's why we're embracing our entrepreneurial spirit and bringing innovation back to the heart of what we do. To be the partner helping our customers take on the challenges they face – as we move into a world of new fuel technologies and new industry standards.

Design

Our design process sees our experts work hand-in-hand with our customers. Only by collaborating openly with some of the planet's biggest and most successful vehicle manufacturers can we truly understand their challenges and design tailored solutions which enable them to thrive. All designs are prototyped for testing and validation, with nothing reaching full production until everyone is confident of its efficiency and effectiveness. Our unrivalled knowledge and understanding of transport and fuel system technology puts us in a unique position to perform accurate field trials and analysis of our designs before they reach the market. Only then can we deliver the reliable, sustainable, and effective innovations that we are known for.

Develop

Once proven following our rigorous testing and validation process, our innovations are ready for production and manufacture. With a global network of state-of-the-art manufacturing facilities, we ensure all components are produced to the highest standards, regardless of the application. Few businesses have the same level of experience and expertise in customer specific systems as our strategic brands. Our manufacturing process adheres to the highest quality standards to ensure we always meet and exceed the expectations of our global customer base. Each product is subjected to constant testing at each stage of manufacture, including end-of-line testing, prior to delivery and installation.

Deliver

Deliver means more than simply despatching a product to a customer. Instead, we provide a complete service to create and deliver bespoke solutions which match all customer requirements, including installation and commissioning. We understand that performance, while critical, is just one of several expectations our customers have when they request products from IRTS. Another is total cost of ownership (TCO), and by ensuring our products are designed to exact specifications and custom-engineered, we keep TCO down and ensure that our products always perform to the highest standard, even when operating in extreme or challenging environments. For more than 50 years, we have been operating our own dedicated local installation, servicing, and support facilities, run by industry professionals. With local aftermarket locations situated in strategic locations across the world, we keep your vehicles operating for maximum uptime.

Strategic Brands

The strategic brands are core to IRTS.

It takes decades to build a legacy and few brands have quite the market legacy and reputation as Gardner Denver Transport Solutions, GHH RAND®, EMCO Wheaton, TODO, Robuschi and HIBON. That's why the creation of Ingersoll Rand's Transport Solutions has been implemented with these six brands at the core.

Our strategic brands will continue to operate in their markets, under their individual names, to further their excellent reputations. **IR embraces these businesses as an umbrella brand, bringing together more than 160 years of knowledge and experience.**

Day-to-day very little will change; our brands remain the focus of our communication efforts. Long-term, our ambition is to further develop the technology, solution-base and expertise of these brands, made possible with the innovation, collaboration, and scale of Ingersoll Rand.

Gardner Denver Transport Solutions

Gardner Denver is a world leading provider of equipment designed to transfer bulk material from road tankers and other vehicles. They also specialise in compressor packages for electric and hybrid vehicles, along with truck hydraulic and AirDrive on board power systems.

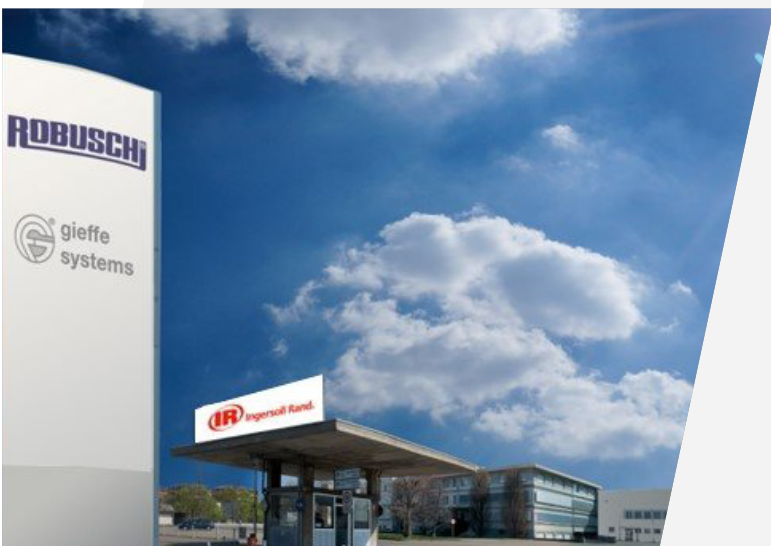

GHH RAND Transport

GHH RAND® Transport is a leading manufacturer of truck and road tanker mounted compressors for the dry and liquid bulk market.

Emco Wheaton & TODO

EMCO Wheaton and TODO provide trusted, industry-leading solutions for the safe and efficient transfer of fuels, fluids, and gases. With decades of expertise, the two brands support customers worldwide through advanced tanker equipment, fleet fuelling systems, and DRY-BREAK® coupling technologies for demanding loading and unloading applications.

Robuschi Transport Solutions

With over 70 years of experience Robuschi is world renowned in the vacuum and blower markets. Derived from a wide industrial range of blowers and vacuum pumps, Robuschi developed a dedicated range of vacuum pumps and blowers specifically for transport applications.

Hibon Transport Solutions

HIBON was founded in 1889, starting as a small cycle and gear manufacturing company. The brand has grown significantly and is widely recognised as a leader in truck mounted positive displacement vacuum pumps for sewer cleaning, hydro-excavation or vacuum suction.
