

10-15 HP VARIABLE SPEED ROTARY SCREW COMPRESSORS

## DRS Series

### Innovative, Integrated Design

DRS Series compressors feature innovative, integrated air end designs that reduce connection points, enhance reliability, and promote superior serviceability. The simplified, reduced-component approach extends beyond the air end into the oil and air cooler. This combination cooler results in a reduction in energy consumption, low discharge air temperatures, and an increase in overall system reliability. Couple these service and reliability benefits with the unit's small footprint and it's easy to see why the integrated design approach sets the DRS Series apart from the competition. Best of all, it's affordable.

### Quiet & Built to Perform

Designed with energy efficient inverter drives and motor combinations, DRS Series variable speed compressors from Champion are built to perform and ideal for environments where the air demand fluctuates. The variable speed drive's pressure tracking controls ensure that energy use is optimized by producing only as much air as is needed, avoiding artificial demand. The quiet enclosed design enables you to install the compressor near the point-of-use without any concern of elevated noise levels. The DRS Series yields noise levels as low as 70 dBA allowing you to work comfortably 24/7.

### Air System Solution

A DRS Series Air System is a complete solution for your application featuring a:

- Rotary screw compressor
- Variable speed drive
- Refrigerated air dryer & 1 micron pre-filter
- Two separate electrical connections (compressor & dryer)
- Tank drain
- Controller

It's the compact, plug-and-play compressed air solution you've been looking for. The DRS Series Air System is your true compressed air system solution.
