

Case Study

## Champion Keeps A Light Manufacturing Company Running Efficiently and Comfortably

When we asked a light manufacturing company what they thought of their Champion 50 HP variable-speed drive rotary screw air compressor, he was quick to communicate their happiness with choosing Champion. Since the air compressor needed to be situated on the shop floor, space and noise concerns were top of mind. The DRS 50's small footprint and quiet operation allows their employees to work comfortably and safely with a reliable supply of compressed air, ultimately increasing their productivity.

Champion's DRS Series compressors' reliability and serviceability benefits, along with a small footprint, make it easy to see why the DRS Series sets itself apart from the competition. Designed with energy efficient inverter drives and motor combinations, these variable speed compressors from Champion are built to perform and ideal for environments where air demand fluctuates. The whisper-quiet, enclosed design ensures you can place the unit near the point-of-use without worrying about elevated noise levels. This allows you to work comfortably 24/7. Best of all, they are affordable.

“This is our first Champion air compressor and it won't be the last - it's compact, quiet and delivers clean compressed air for our application reliably - we're glad we went with Champion.”

### Overview

**APPLICATION**  
Light Manufacturing

**PRODUCT**  
Champion DRS 50

**CUSTOMER BENEFIT**  
Energy efficient operation with low noise levels

## About Champion

Champion provides the highest quality reciprocating and rotary air compressor systems, parts and service. Champion utilizes a century of experience in designing and manufacturing air compressor systems. We know and understand the application of our products in many different operating environments.

Champion has a long, rich history in the compressed air market. For a century, Champion has supplied high quality, reliable compressed air systems. Our products keep industries such as automotive, industrial, woodworking and agriculture up and running.
