ROBOX TURBO
AIR FILTER SERVICE KITS

Small Maintenance. Big Impact.

Protect Performance. Extend Reliability. Save Up to 60%

LIMITED-TIME PROMOTION: UP TO 60% DISCOUNT WITH IMMEDIATE DELIVERY.

Robox Turbo blowers are engineered to provide reliable operation with very limited maintenance throughout their service life. However, one maintenance activity remains essential to ensure efficient and trouble-free operation:

REGULAR AIR FILTER REPLACEMENT

Clean air filters play a critical role in:

- Maintaining optimal blower performance
- Protecting the airend from dust and contaminants
- Reducing energy consumption
- Preventing unexpected downtime
- Extending equipment lifetime and reliability

While the Robox Turbo requires only minimal maintenance, **timely filter replacement is fundamental for the correct operation and long-term protection of the machine**.

Complete Air Filter Service Kits Available both indoor and outdoor versions:

- Canopy Filter
- Medium Filter
- Pre-Filter

RECOMMENDED MAINTENANCE SCHEDULE

Under **normal operating conditions**, we recommend replacing the air filters **twice per year**.

Each **Air Filter Service Kit** contains the correct quantity of filters required for **one blower operating for 12 months**, based on the recommended maintenance schedule.

Please note: In particularly hot, dry, or dusty environments, filters may require replacement more frequently to maintain optimal machine performance and ensure adequate protection.

WHY REPLACE YOUR FILTERS NOW?

UP TO 60% OFF UNTIL END OF 2026
