PARTS PLAN PROGRAM

**Protect Your Investment
Optimise Performance**

OEM Parts with 36 Months Warranty!

You won't need to think about sourcing parts and lubricants to carry out service & maintenance operations for the entire 36 Months after Start-Up.

HOW DOES IT WORK?

1 The Robox package will leave the factory with the Commissioning-Start-Up Kit along with full instructions of the commissioning procedure.

2 You receive the confirmation of extended warranty registration.

3 At the pre-determined time*, you'll receive a reminder for the obligatory 500Hr maintenance operation, along with any other checks/adjustments required.

*Note - the predetermined times are based on the anticipated commission date (details are shown in the contract document/proposal)

4

For the remaining duration of the warranty (factory & extended) you will receive automatic service/maintenance reminders at the appropriate time, indicating what operations are required to be carried out to keep your unit running at optimal performance.

5

During the course of the warranty the required service kit/s will automatically be sent to you at the appropriate time, allowing you to carry out the required maintenance operations, you will also receive the list of operations required.

6

For Robox Lobe units you will receive 1 kit at approximately 22 months post commissioning, for Robox Screw Units you will receive a kit at approximately 11 months post commission and a subsequent kit at month 22.

The standard factory warranty remains in place with its current terms & conditions but is extended to 36 months not including labour after the standard factory warranty has expired.
