

A NEW ELECTRIC RATE PLAN TO HELP YOU SAVE

INTRODUCING THE WHOLE HOUSE TIME OF USE (TOU) RATE

Pepco now offers Maryland electric vehicle (EV) drivers the Whole House TOU* electric rate. This new electric rate option is designed to help you manage your energy costs by letting you save on your electric bill when charging your vehicle during off-peak hours, when electricity prices are lower than peak hours†.

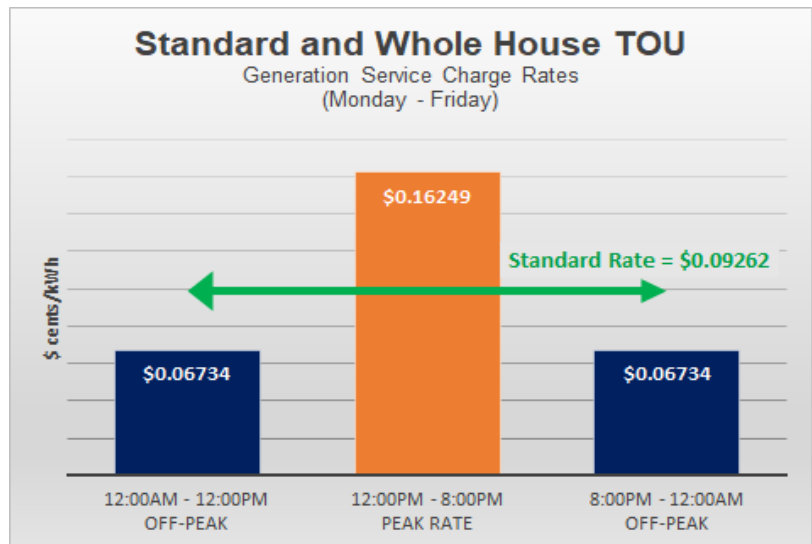

ELECTRIC RATE PLAN OPTIONS

Standard Offer Service Rate

- Default rate for Pepco residential customers who choose the Standard Offer Service
- Residential price plan with the same generation service rate for each hour of the day

Whole House TOU Rate

- Rate option for residential customers who drive an electric vehicle capable of traveling at least 30 miles using electricity as fuel, without the use of gas
- Generation service rate is lower during off-peak times, and higher during peak times
- Plan qualifies energy usage for the entire home and uses a smart meter to keep track of your electricity usage and allows you to adjust habits and lower your energy bill

*Customers with 3rd party suppliers are ineligible for this rate. Net Energy Metering customers are not eligible for this rate.

†Peak hours are Monday – Friday, noon to 8 pm, excluding holidays. Off-peak hours are all other times.

FIND THE RIGHT RATE FOR YOUR NEEDS

The time of day that you choose to charge your EV may impact your Pepco bill.

Consider the following to determine which electric rate plan fits your needs based on when you plan to use electricity in your home and charge your EV.

Visit [pepco.com/myaccount](https://www.pepco.com/myaccount) to view your historic daily energy usage, learn energy-saving tips, and determine which rate is best for you.

	Charge Times	Energy Usage	Flexibility
The standard rate (Schedule "R")[§] might be the right fit if you:	Charge your EV any time of the day	Have higher than average household energy use during peak times	Are unable to shift your primary electricity usage at home to off-peak times
The Whole House TOU rate ("R-PIV")[§] might be the right fit if you:	Charge your EV mornings, evenings, and overnight	Use household energy during off-peak times to save money	Can shift your primary electricity usage at home to off-peak times

PEPCO ELECTRIC RATE SCHEDULES | Effective June 1, 2024

Generation Service Charge	Standard Residential Winter Oct 2024– May 2025	Whole House TOU Winter Nov 2024 – May 2025	Standard Residential Summer Jun 2024 – Sep 2024	Whole House TOU Summer Jun 2024 – Oct 2024
Standard	0.10348/kWh [¶]		0.09262/kWh	
Peak kWh Charge		0.22206/kWh		0.16249/kWh
Off-peak kWh Charge		0.07368/kWh		0.06734/kWh

Schedule "R" and "R-PIV" rates are based on Administrative Charge rates effective June 1, 2024.

Distribution and transmission charges apply for both standard and Whole House TOU rates.

[§]Schedule "R" and "R-PIV" are how these rates will appear in the tariff pages.

[¶]kilowatt hour

ENROLL TODAY
