

COMPREHENSIVE COVERAGE FOR
**OPTIMAL
PERFORMANCE**

From genuine spare parts to
planned preventive maintenance
and comprehensive lifecycle
support.

The right level of service for
every stage of your equipment
lifecycle.

EVEREST

An Ingersoll Rand Business

Downtime Is Expensive. Reliability Is a Strategy.

Industrial blowers and vacuum systems are critical to your operations. Delayed maintenance, unavailable spares, or reduced performance can lead to downtime, higher costs, and lost productivity.

Common Operational Challenges

Unexpected Equipment Downtime

Unplanned failures can interrupt production, delay deliveries, and impact operational efficiency.

Escalating Maintenance Costs

Reactive repairs often lead to higher expenses, emergency interventions, and unplanned resource allocation.

Spare Parts Availability Risks

Long lead times and inventory challenges can prolong outages and increase operational risk.

Limited Technical Resources

Maintenance teams may not always have immediate access to OEM expertise and specialized product knowledge.

How Everest Service Agreements Help

Increase Equipment Availability

Proactive maintenance programs help minimize unexpected breakdowns and improve system reliability.

Optimize Maintenance Planning

Scheduled inspections and preventive maintenance support better planning and resource utilization.

Reduce Inventory Carrying Cost

Structured service agreements help reduce unforeseen maintenance expenses and enable better budgeting.

Extend Equipment Life

Regular maintenance and timely replacement of wear components help maximize equipment performance and lifecycle.

Three Service Options. One Reliability Goal.

Choose the level of support that best fits your maintenance strategy and operational needs.

SPARES AGREEMENT

Genuine OEM spares with predictable pricing.

ANNUAL MAINTENANCE CONTRACT

Planned maintenance to improve reliability and performance.

COMPREHENSIVE MAINTENANCE CONTRACT

Comprehensive support for maximum uptime and peace of mind.

Compare Coverage. Choose with Confidence.

Typical coverage is shown below. Final inclusions are defined in the agreed commercial and technical scope.

SERVICE ELEMENT	SPARES	AMC	CMC
Supply of pre-agreed genuine spare parts	☒		☒
Fixed pricing / multi-year agreements		☒	☒
Operational risk transfer to Ingersoll Rand	☒		☒
OEM-approved service technicians		☒	☒
Combination of plans / equipment			☒
Competitor equipment coverage			☒
Dedicated on-site / full-site support		☒	☒
Overhaul / replacement built in			☒

IMPORTANT

Coverage, response time, parts inclusion, contract duration and equipment eligibility are confirmed in the final agreement.

THREE PLANS. ONE OBJECTIVE: MORE RELIABLE EQUIPMENT PERFORMANCE.

WHY CHOOSE EVEREST SERVICE?

01

GENUINE SPARE PARTS

Protect equipment integrity with genuine, pre-agreed parts.

02

TRAINED SERVICE EXPERTISE

Access product knowledge and structured maintenance support.

03

PREDICTABLE COSTS

Improve visibility of service and spare-parts expenditure.

04

PROACTIVE SUPPORT

Identify service needs early through planned maintenance.

05

FLEXIBLE AGREEMENTS

Configure support for equipment, assets or broader sites.

06

LIFECYCLE SUPPORT

Move from parts planning to comprehensive care.

LET'S BUILD THE RIGHT SERVICE PLAN FOR YOUR OPERATION.

Contact the Everest service team for an equipment review and service-agreement recommendation.
