

POSITIVE DISPLACEMENT BLOWERS & VACUUM PUMPS

TWIN LOBE & TRI-LOBE SERIES

CATALOGUE INCLUDES

Twin-lobe Rotary Air Blowers | Compressors
Tri-lobe Rotary Air Blowers | Compressors
Tri-lobe Vertical Rotary Air Blowers | Compressors
Twin Lobe Rotary Gas Blowers | Compressors
Integral Gear Box Design - High Speed Turbo Blowers
Multistage Centrifugal Blowers
Acoustic Hoods | Enclosures
Vacuum Pumps
Spares

What we do?

Everest Blowers has been designing and manufacturing superior quality compressed air solutions since 1980 - with 4 decades of experience developing high quality Roots Blowers. In the tough & global market - we strongly adhere to competitive pricing, sturdiness, efficiency, innovation and ease of maintenance. Over the past years we have thrived to lead the Indian and Asian Market, earning world-wide credibility and have exported our blowers to over 38 countries world-wide.

We believe that our reputation for reliable products, excellent services and timely deliveries has helped us grow into a globally recognized brand enabling success for our customers/users. We Aim to preserve production standardization making sure we remain at par with other worldwide manufacturers.

Mission	Vision
<p>Provider of Innovative engineering solutions in entire range of pressure & vacuum systems by having state of art technology, optimized designs, excellence in R&D, manufacturing and thrust on training & development of employees, continuously expanding our operations.</p>	<p>To become top solution provider by being a prominent and trusted brand for:</p> <ul style="list-style-type: none"> • Positive Displacement Blowers in the world • Low Pressure Compressors in India <p><i>Everest-First in Sight, First in Mind.....</i></p>

Quality Policy	Quality Objectives	Core Values
<p>We at Everest are committed to continually improve in all process areas leading to quality product by involving competent and motivated employees at all levels leading to overall growth of the company through satisfied customers.</p>	<ul style="list-style-type: none"> • Delivery on time, delivery in full, of defect free products • Wastage reduction • Introducing New/ upgraded products better than the competitor, meeting customers' expectations • Cost reduction by Value Engineering/ other methods • Timely and effective customer support & services • Achieving and sustaining superior levels of performance in all operations • Up gradation of infrastructure • Human resources development 	<ul style="list-style-type: none"> • Customer Focus • Respect for Individuals • Ethics & Integrity • Sincerity at workplace • Self motivated individuals • Transparent Communication Channels • Institution Building thru skill enhancement

ABOUT US

A focus on
innovative
design and high
quality
machined parts
has earned
Everest a
reputation for
excellent
workmanship
amongst its users.

For almost four decades Everest has offered its customers quality, cost-effective machines necessary to meet the changing technology

EVEREST commenced manufacturing of Positive Displacement Rotary Air Blowers way back in 1980. Since then the company has consistently strengthened its manufacturing base, producing a wide range of products. This broad product line includes Twin Lobe & Tri-Lobe Rotary Air Blowers / Compressors (Roots Blowers), Blower Package, Mechanical Vacuum Boosters, Dry Screw Vacuum Pumps, Acoustic Hoods Turbo Blowers, Multistage Centrifugal Blowers & Industrial Vacuum Systems. These wide-ranging products and the technical expertise gained over the years have enabled Everest to serve various segments of industry such as Water Treatment Plants, Effluent Treatment Plants, Cement Plants, Aquaculture Farms, Flue Gas Desulfurization (FGD), Chemical & Pharmaceutical Plants, Food Processing Units, Waste Oil Re-refining Units, Paper Plants, Vacuum Plants and Systems and Pneumatic Conveying Systems.

The blowers find use in applications requiring medium pressure air such as aeration in sewage treatment and effluent treatment plants, filter backwash, agitation of electrolyte, pneumatic conveying, regeneration of dryers & molecular sieves, maintaining BOD of water etc.

The mechanical vacuum booster & Dry Screw Vacuum Pumps, a sophisticated piece of machinery developed by the company, finds use in chemical and pharmaceutical processes, bulb and tube light production, waste oil re-refining, roll and object metallizing, vegetable oil deodorization, solvent recovery, vacuum drying, tray drying, vacuum distillation, thin film deposition, molecular distillation, vacuum furnace, transformer oil dehumidification, chemical laser, evaporative cooling etc.

Apart from above standard products Everest is also into a lot of customized products which include various specialized equipment to meet the specific demands such as Canned Motor Mechanical Vacuum Boosters especially developed for BARC for research applications, Helium and CO₂ duty blowers for Nuclear Power Corporation, Petrol engine driven aluminium alloy blowers for thermit welding of rails for Indian Railways, 100% Oil Free blowers for fish and prawn culture, etc.

Everest is also into supply of complete systems for special applications such as Vacuum Distillation, Vacuum Drying (Vacuum Tray Dryers, Rotary Cone Vacuum Dryers, etc), Solvent Recovery, Waste Oil Re-refining etc. which are commonly used

in Food Processing, Pharmaceutical & Chemical Industries. Everest also offers 100% Dry Vacuum Systems having no requirement of Steam, Water or Oil. This leads to zero effluent / zero discharge of any harmful gases inside the plant, thus maintaining high level of product quality and maintaining pollution free environment.

Some of our prestigious clients include NIOT, NPCIL, Indian Space Research Organization, Centre for Advanced Technology, BARC, Mishra Dhatu Nigam, NTPC, Ion Exchange (India) Ltd., Thermax, Aurobindo Pharma, KLJ, Wockhardt, VA Tech Wabag, Maruti Udyog, Honda Siel, Hero Honda, Grasim Industries, Cadbury, LG Polymers, Heinz, Vam Organics, Smithkline Beecham, Cipla, DSM, Hereto Drugs, IOCL, GAIL, EIL, BHEL, Grasim, ACC, Tata Steel, Jindal Steel, McNally Bharat, Jindal Saw and many more.

We are concentrating more on application engineering and in helping our customer's save on their processes. This innovation has not only compensated on our general sales but even helped us to outperform on our targets. Our application oriented R&D team has made it possible to cover wider areas of applications, offering cost effective and energy efficient solutions thus creating larger market demand for our products.

A focus on innovative design and high quality machined parts has earned Everest a reputation for excellent workmanship amongst its users. For more than three decades Everest has offered its customers quality, cost-effective machines necessary to meet the changing technology. Our commitment to total quality in both our products and services is the foundation upon which our future business is based.

Some of Our Recent Achievements

- Design & manufacture of seal less Roots Blowers
- Design & manufacture of solvent recovery systems to curb pollution. These systems not only play an important role by making the process eco-friendly but also recover precious solvents for reuse.
- Design & manufacture of CPCB approved systems for waste oil re-refining.
- Design & manufacture of mechanical vacuum boosters for replacement of steam jet ejectors.

ABOUT US

- Design & manufacture of SUPERVAC vacuum systems using mechanical vacuum boosters and dry screw vacuum pumps - Dry Pumping Technology.
- Design & manufacture of extended shaft Roots Blowers for applications requiring 100% Oil Free Air like aeration in aquaculture farms, plating lines, STPs, etc.
- Design and manufacture of canned motor mechanical vacuum boosters
- Design & manufacture of India's first MVR (Mechanical Vapour Recompressor) Blower successfully put to use.
- Design & manufacture of Low Temperature Thermal Desalination systems for producing potable water and many more.
- We have set up the most modern manufacturing facility with in house DSIR registered R&D facility which would not only role out good reliable products but also assist in meeting the targeted expansion program.

Everest is the first and the only Indian Blowers manufacturer to have successfully shifted entire production load of its blowers, boosters & pumps on CNC machines. The company has imported a number of sophisticated CNC machines from USA & Japan, resulting in higher production capacities & better quality. Everest is today the largest Roots Blower manufacturer in the country and the market leader in its segment.

Broad Product Line Serves Wide Variety of Applications

We know that performance of the OEM's design ultimately depends on the quality and dependability of its components. That's why so many manufacturers of Water Treatment Plants, Effluent Treatment Plants, Cement Plants, Aquaculture Farms, Chemical Plants, Paper Plants, Vacuum Plants and Systems, and Pneumatic Conveying Systems have entrusted their reputation to Everest. Our broad product line of Roots Blowers/Compressors (Bi-lobe & Tri-lobe) (Air/Gas Duty), Mechanical Vacuum Boosters, Dry Screw Vacuum Pumps, Acoustic Hoods & Industrial Vacuum Systems consists of standard and custom models that fall into major product group.

Our Commitment To Quality | ISO 9001:2015

The hallmark of our commitment to quality is our International Standards Organisation (ISO) registration. This ensures that our OEM customers receive products of highest quality.

TIMELINE

1986-1990

Everest became a prominent brand among the top quality blower manufacturing companies of India. Bagged prestigious orders from Bharat Rattan companies like NTPC, SAIL, IOCL, ONGC etc. in the public sector and got approvals from consultants like EIL, TOYO, TATA, IPCL and various others.

2001-2008

Everest was already manufacturing over 100 blowers/month. Various new models developed keeping in mind customer requirements and expectations. Started Exports to countries like USA, Singapore, Middle East and South East Asia with help of distributors and thru EPC's. First in India – Sea Water Desalination plant-was made using Everest Vacuum Pumps and Boosters with NIOT – commissioned in 2005. First Indian MVR blower was developed in house by Everest and supplied to chemical plant in Maharashtra for ZLD. This period also gave birth to dedicated Vacuum Pumps & Skid mounted systems facility of Everest Blowers.

2015-2019

Both the units of Everest Blowers were merged and Single big factory was made in HSIIDC Bahadurgarh. Today we manufacture over 10,000 Twin & Tri Lobe Blowers/Annum in this unit. It's a one of its kind machining and assembly setup with highly skilled workforce in all departments. Today Everest proudly states, we have approvals with all major consultants, Jal Boards and Govt. Bodies and are the most preferred brand for Blowers with all leading EPC's and OEM's in India. We work on model of "Best Quality, Reasonable Cost, Timely Delivers & On time Service". Everest Blowers are running in over 38 countries worldwide and for us its still – just the beginning.

1980-1985

Design and Manufacturing of Blowers was started under the brand name of "EVEREST" in New Delhi by a Graduate engineer with a long term vision – to manufacture Twin-Lobe rotary Air compressors for various industrial and Waste Water applications. During the early days, Everest being one of the only quality manufacturers of Roots Blowers in India was chosen as a preferred supplier by BHEL and QMS developed in close coordination with their team.

1991-2000

Owing to growing demand of " EVEREST BLOWERS" in the market, a new manufacturing unit was set up and products bifurcated in form of small blowers (upto 20KW) in one manufacturing unit and Big Blowers (20-300KW) in the other manufacturing unit. ISO 9001 certification was first taken in year 1998 from DNV in order to upgrade systems and processes

2009-2014

Everest Blowers converted into Pvt. Ltd. company and received award from then prime minister Dr. Manmohan Singh for excellence in R&D under the MSME category. This was the period our Vacuum Division was growing rapidly and also shifted to a State of the Art Manufacturing facility at HSIIDC, Bahadurgarh. Today our vacuum pumps wing is the largest and most trusted company with customers in all Industrial/Process Applications.

Future is Bright

Everest plans to lead by innovation thru lean manufacturing practices and staying closely connected to the fast changing demands of our customers. We have already added Turbo-Blowers to our kitty and plan to move into various verticals of compressed air to meet the demands of our users. "*Make in India, Take India Global*" being our Motto for years to come.

**Everest
Product Range**

TWIN LOBE ROTARY GAS BLOWERS

TRI-LOBE ROTARY AIR BLOWERS

TRI-LOBE VERTICAL ROTARY AIR BLOWERS

TWIN-LOBE ROTARY AIR BLOWERS

ACOUSTIC HOODS | ENCLOSURES

INTEGRAL
GEAR BOX DESIGN TURBO BLOWERS

MULTISTAGE CENTRIFUGAL BLOWERS

EZR SERIES ROTARY AIR BLOWERS (TWIN LOBE)
(For Air Flow Over 20,000 m³/hr)

BI-LOBE & TRI-LOBE ROOTS AIR BLOWER APPLICATION

Over 1,50,000 domestic & international installation of Everest Blowers are a proof of our reliability & strength, providing universal solutions in wide ranging applications such as:

- Water Treatment
- Sewage Treatment
- Biogas
- Cement
- Coal
- Textile
- Power
- Pneumatic Conveying
- Chemical
- Construction
- Aerospace
- Agriculture
- Energy
- Petrochemical
- Pharma
- Food Processing
- Sugar
- Metal Industries
- Paper
- Glass
- Plastics
- FGD - Flue Gas Desulfurization
- VPSA - Vacuum Pressure Swing Adsorption
- Truck Mounted Blowers (Vacuum Applications)

DESIGN & TECHNICAL FEATURES TWIN-LOBE BLOWERS

Seal:

Low-wear, non-contacting, labyrinth-type seals ensure performance and long life.

Shafts:

Rotor shafts are alloy steel forgings that allow higher operating pressures and rotation speeds

Casing:

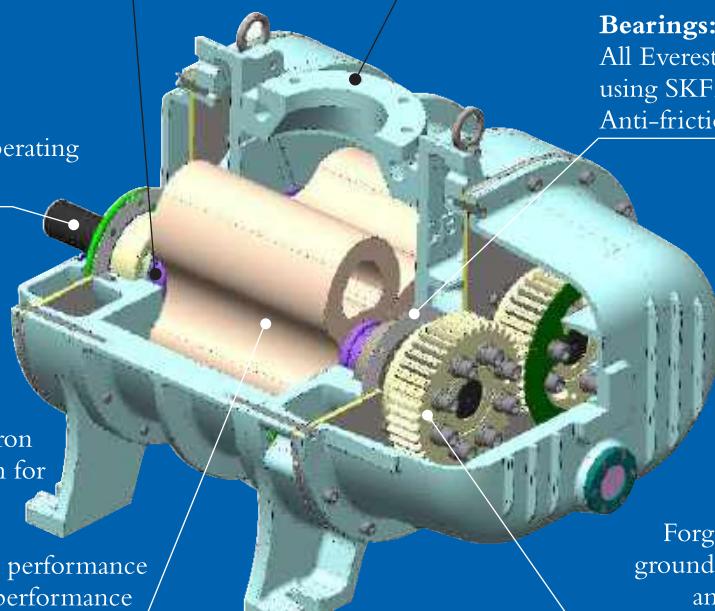

All Everest Blowers units are single-piece construction and precision machined cast iron, with ribs for strength and consistent thermal behavior.

Rotors:

Made from cast iron or SG iron stainless steel with stiff design for maximum life.
By CNC and 3D machinery control to ensure the highest performance providing with trouble-free performance and durability.

Bearings:

All Everest Blower units are using SKF/FAG Eqv. bearings with long life. Anti-friction type vary with machine.

**Timing Gears:**

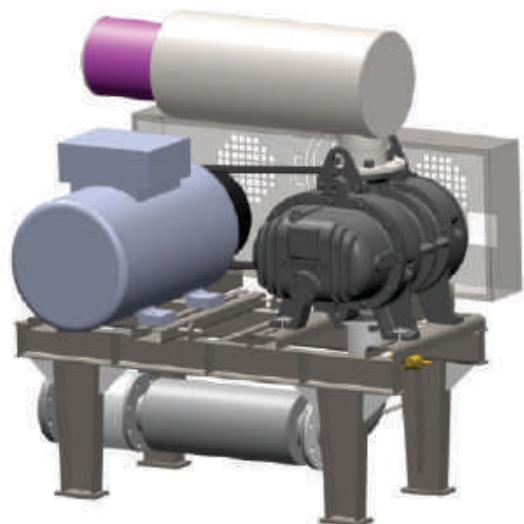

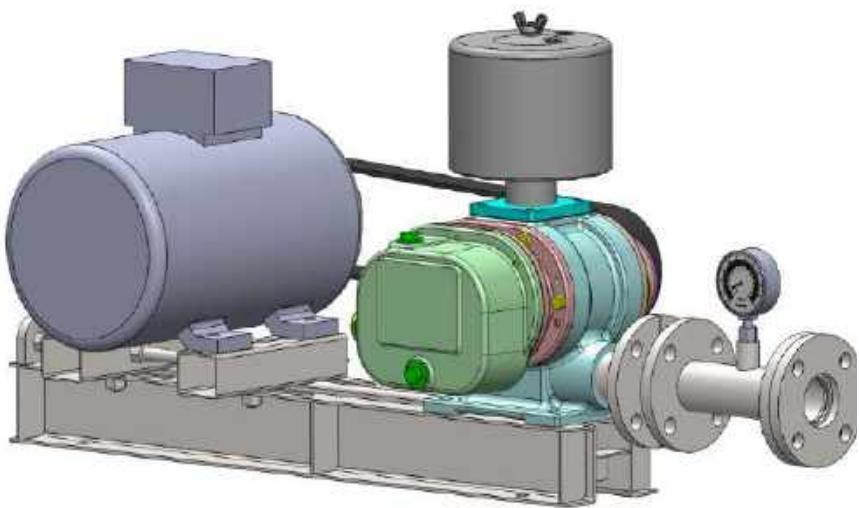

Forged steel gears with hardened and ground spur teeth to reduced vibrations and ensures accurate rotor to rotor timings for smooth and efficient operation.

ENQUIRY

- ◎ Everest develops positive displacement blowers for a full range of application.
- ◎ When enquiring, please inform us the following:
 - Application: Water Aeration, Pneumatic Conveying etc.
 - Specifications:
 - Suction Capacity (Air Flow Requirements)
 - Differential Pressure
 - Temperature
 - Humidity
 - Drive: Motor Type, Condition
 - Installation: Indoor or Outdoor, Ambient Temperature
 - Type of Gas: Name and Properties

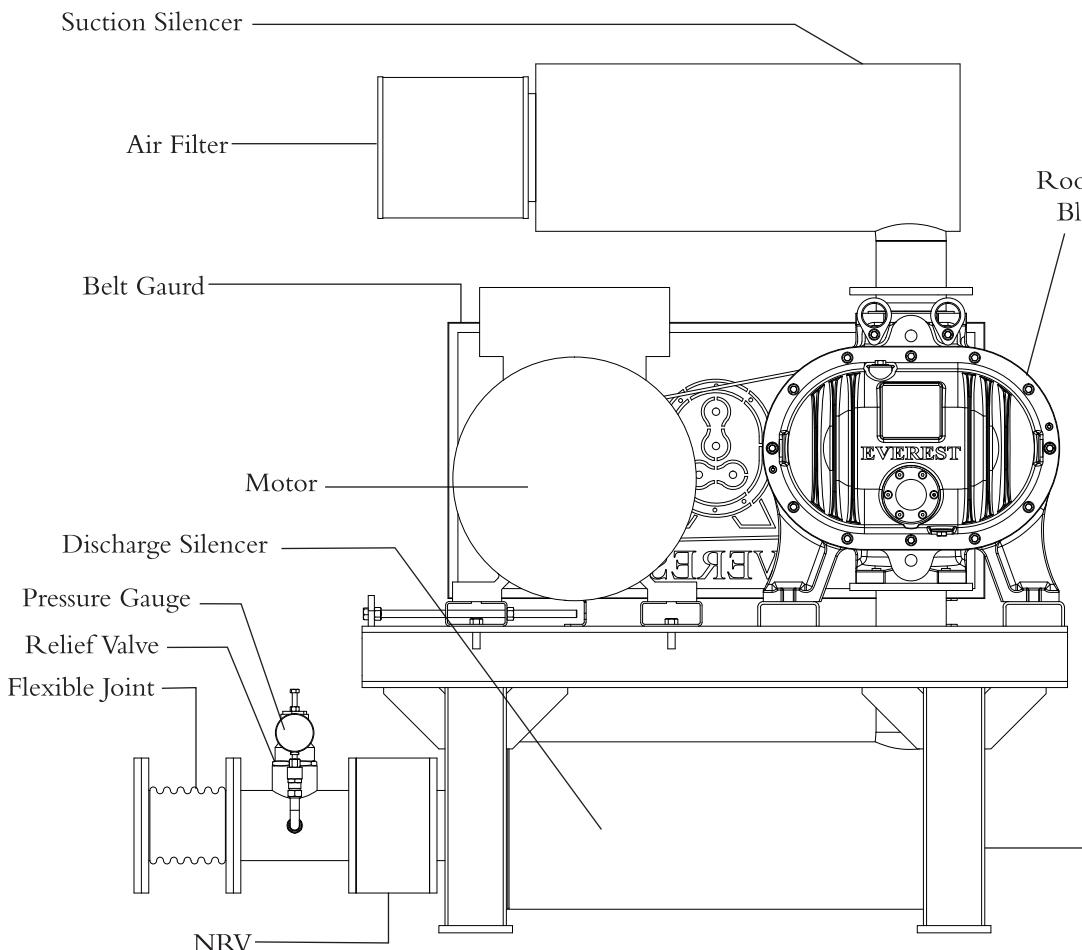

TWIN-LOBE BLOWER COMPLETE SET

ADVANTAGE

Wide range of volume, pressure & horse power

- Bore : 25NB to 450NB (1" to 18")
- Pressure : 1000mmWC to 7000mmWC (Air cooled)
8000mmWC to 10000mmWC (Water cooled)
- Horse Power : 0.5HP to 650HP (0.372 kW to 500 kW)
- Capacity : 10 to 20000 m³/hr

* Max. height of blower (From hook top to foot bottom or Blower Discharge top to foot bottom) Unit s: mm, Weight (WT.) : Blower weight in "Kg"

The above Noise Level are given considering Blower without Acoustic Hood at 1500 RPM and 4000 - 5000 mmWC

All Blowers from 6 inch series and above are suitable for Pressure & Vacuum applications; Max. Vacuum: 5000 mmWC

DESIGN & TECHNICAL FEATURES TRI-LOBE BLOWERS

Seal:

Low-wear, non-contacting, labyrinth-type seals ensure performance and long life.

Shafts:

Rotor shafts are alloy steel forgings that allow higher operating pressure and rotating speed

Rotors:

Made from CI or SG iron with stiff design for maximum life.
By CNC and 3D machinery control to ensure the highest performance providing with trouble-free performance and durability.

Casing:

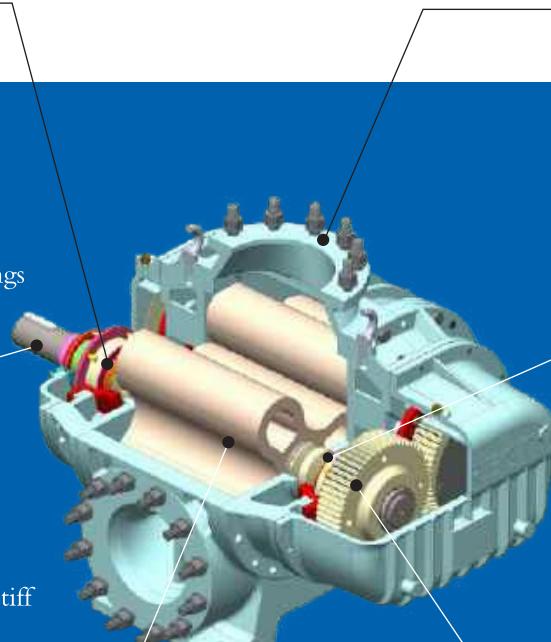

All Everest Blowers units are single-piece construction and precision machined cast iron, with ribs for strength and consistent thermal behavior.

Bearings:

All Everest Blower units are using SKF/FAG bearings with long life. Anti-friction type vary with machine.

Timing Gears:

Forged steel gears with hardened and ground spur teeth to reduced vibrations and ensures accurate rotor to rotor timings for smooth and efficient operation.

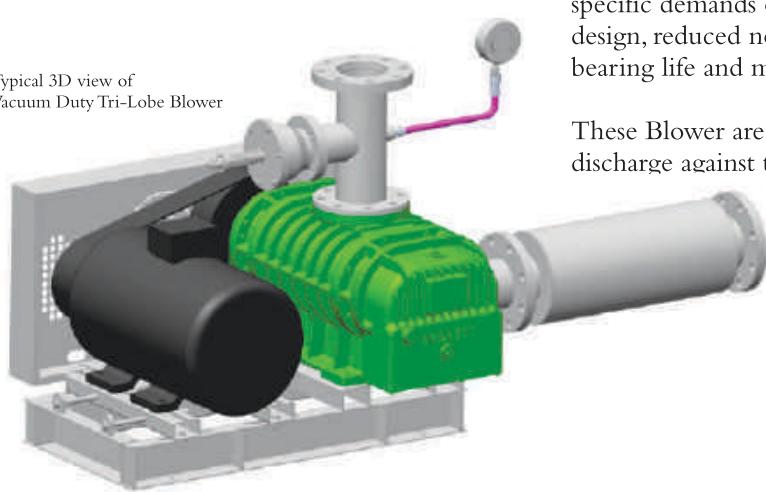

ENQUIRY

- ◎ Everest develops positive displacement blowers for a full range of application.
- ◎ When enquiring, please inform us the following:
 - Application: Water Aeration, Pneumatic Conveying etc.
 - Specifications:
 - Suction Capacity (Air Flow Requirements)
 - Differential Pressure
 - Temperature
 - Humidity
 - Drive: Motor Type, Condition
 - Installation: Indoor or Outdoor, Ambient Temperature
 - Type of Gas: Name and Properties

TRI-LOBE BLOWER COMPLETE SET

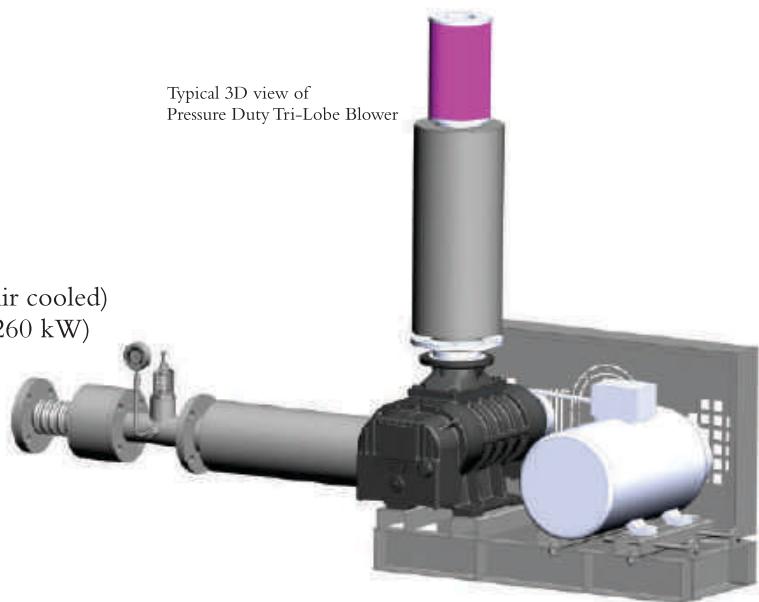

Typical 3D view of
Vacuum Duty Tri-Lobe Blower

Everest Tri-lobe Rotary Air Blower have been designed keeping the specific demands of the industry of continuous duty operation, sturdy design, reduced noise, reduced pulsations and vibrations, longer bearing life and minimal maintenance in mind.

These Blower are constant volume machines, which deliver a fixed discharge against the system back pressure.

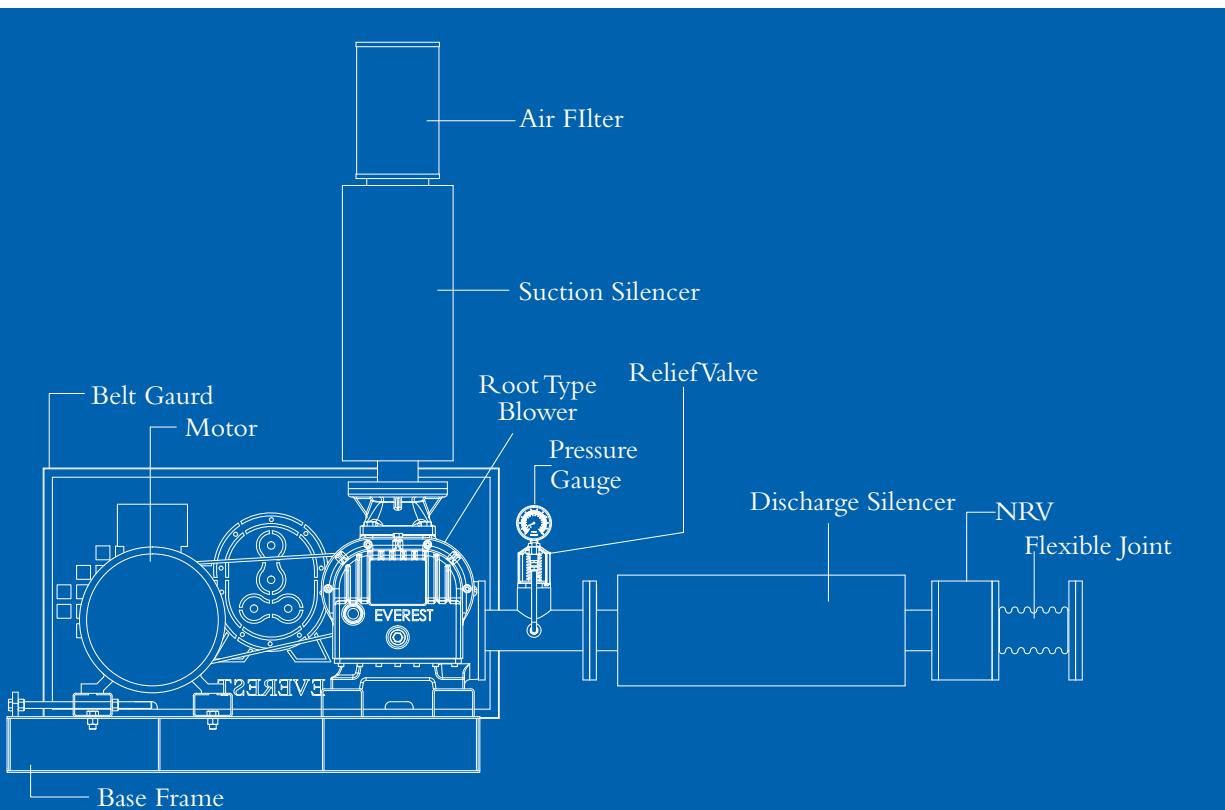

Typical 3D view of
Pressure Duty Tri-Lobe Blower

ADVANTAGE

Wide range of volume, pressure & horse power

- Bore : 25NB to 350NB (1" to 14")
- Pressure : 1000mmWC to 8000mmWC (Air cooled)
- Horse Power : 0.3 HP to 345 HP (0.22 kW to 260 kW)
- Capacity : 10 to 14000 m³/hr

* Max. height of blower (From hook top to foot bottom or Blower Discharge top to foot bottom) Units: mm, Weight (WT.) : Blower weight in "Kg"
The above Noise Level are given considering Blower without Acoustic Hood at 2800 RPM and 4000 - 5000 mmWC

EVEREST SOUNDPREOF ENCLOSURES PACKAGE

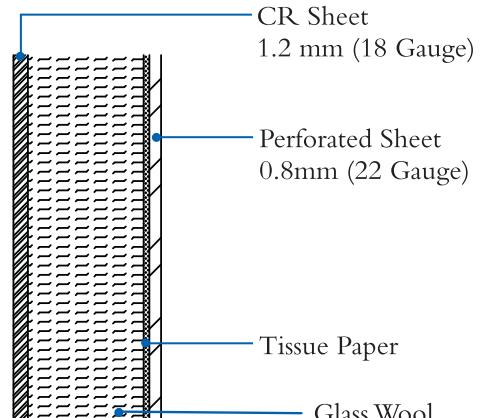

EVEREST in addition to our proven quality on roots blower manufacture, Everest also design high efficiency soundproof enclosures, to solve your noise problem. Each case is specifically manufactured according to your requirements with LT blower package.

FEATURES INCLUDE

- Independent frame system
- Modular acoustic panels
- Reduce noise
- Designed and built for your application
- Guarantee 12 to 25 dB(A) noise reduction (depending on the project)
- Service gate
- Temperature and pressure gauge
- Air inlet and fan covers
- Base frame

ENCLOSURE MATERIAL

*Please get in touch with our technical sales team for your application & requirement of Acoustic Hoods.

SINGLE STAGE HIGH SPEED CENTRIFUGAL BLOWERS (TURBO BLOWERS) SPECIAL MODELS FOR FGD APPICATON (INTEGRAL GEAR BOX DESIGN-HIGH SPEED TURBO BLOWER'S)

Everest is proud to introduce its new range of Single Stage High Speed Centrifugal Blowers (Turbo Blowers). Specially for- FGD projects & high flow + pressure requirements in ETP/STP plants.

FEATURES

- Large capacity and continuous flow because of big size sectional area and high rotary speed.
- Compact structure, smaller size than Piston Compressor and Roots Blower of same capacity.
- Long time stable running and less maintenance.
- No pollution on the compressed Gas.
- Wide range of Impeller material: Forged Aluminum, Forged Steel or Stainless Steel.
- Gear Box Design with Helical Type Nitrogen-hardening gears with more than 20 years life.
- Designed on tri-variate movement theory resulting in high efficiency of 82%.
- Wide Performance Range: With axial inlet guide vanes, flow capacity range can be adjusted from 45% to 110% of the designed value.
- High Pressure Ratio, Max 3.0.
- GD2 is low, easier to start.
- Easily to control the Noise. High grade balanced and light style rotor will generate high frequency noise which can be easily eliminated.
- Covers less floor space.
- Reliable operation.

Standard Unit consists of High Speed Single Stage Centrifugal Blower, Gear Box, Control Cabinet, Inlet Guide Vanes & Thin Oil Station.

Performance Range:

Flow Capacity: $60 \text{ m}^3/\text{min}$ to $1,000 \text{ m}^3/\text{min}$
Outlet Pressure: 1.5 kgf/cm^2 ~ 2.8 kgf/cm^2

Application Areas include Waste Water Treatment, FGD Oxidation Air Blower & MVR.

Please contact Everest for further details.

EZR SERIES LARGE SIZE HIGH PRESSURE PD BLOWERS

Blender collaboration with our overseas partners, **special services of high capacity blowers for application** requiring robust usage in critical environment

Everest is proud to introduce its new range of EZR series PD Blowers. EZR series blowers are large size, high pressure, rotary blowers which have been developed on our rich manufacturing experience to cater to the demand for large capacity & high pressure rotary blowers. It has a special rotor profile which results in a high efficiency & energy saving machine.

FEATURES:

- Rotor with truss head involute profile, advanced and reasonable, with high efficiency.
- Main parts are machined by machining centres and NC facilities, resulting in complete interchangeability, high accuracy & reliable product.
- Forced lubrication for gears and bearings. The oil pump is driven by the blower shaft, so no need for extra power. Also, we can use separate electrical power to drive the oil pump.
- All models work in direct drive mode.
- Available seals: Labyrinth seal, piston ring seal & air extracting seal.
- Delivery medium: Air, semi water, gas.
- Newly designed oil tank structure with effective heat emission. Cooling water is required only if operating pressures exceed 5000 mmWC, thereby reducing operating expenses.
- Split structure design for casing & end plates, resulting in convenience during inspection. Main parts are formed by precision resin sand casting.
- Straight Gear instead of traditional skew gear to avoid excess shaft force which would affect bearing life.

Performance Range:

Pressure Rise from 1,000 mmWC to 10,000 mmWC

Capacity from 317.9 m³/min to 1292 m³/min

Application Areas include Food, Mining, Cement, Pneumatic Conveying, Petrochemical, Smelting, Environmental, Electric Power.

EZR SERIES PERFORMANCE TABLE

MODEL	ΔP	Q (m ³ /min)
EZR7 - 500A	1,000 - 10,000 mmWC	317.9~378.1
EZR7 - 580B	1,000 - 9,000 mmWC	379.2 ~ 530.4
EZR7 - 600A	1,000 - 9,000 mmWC	411.5 ~ 584.3
EZR7 - 700A	1,000 - 8,000 mmWC	465.7 ~ 661.2
EZR7 - 750A	1,000 - 6,000 mmWC	555.3 ~ 740.7
EZR7 - 800A	1,000 - 5,000 mmWC	637.7 ~ 841.6
EZR7 - 700B	1,000 - 8,000 mmWC	663.1 ~ 897.0
EZR7 - 800B	1,000 - 6,000 mmWC	804.7 ~ 1,058.2
EZR7 - 900B	1,000 - 5,000 mmWC	997 ~ 1,292

Please contact Everest for further details.

MULTISTAGE CENTRIFUGAL BLOWERS

Everest Blowers are
**available as
package units,
ready to install**
or as bare blower
units for replacement

Multistage Centrifugal Blowers (Casting Type) are based on design & principle of welded multistage low speed centrifugal blowers. These new generation high efficiency products are the latest product offering from Everest Group.

FEATURES

- Shell of inlet & outlet and return channel of the blower are fully adapt to impeller resulting in streamlined design & hence reduced losses.
- Impeller is designed by three-dimensional meridian plane and compound curve technology, resulting in high efficiency.
- Impeller intake seal-inducer improves inlet fluidity of the impeller.
- Airfoil return flow blade reduces losses resulting in higher static pressures.
- Blower performance is optimized with fluid analysis technology. Polytropic efficiency is upto 78%.
- Some models use three dimensional impeller, resulting in higher efficiency & good performance.
- Rotors are dynamically balanced, resulting in low vibration, high reliability & low overall noise.
- Advanced & reasonable blower structure with no easy-worn parts and convenient installation, operation & maintenance.

Standard Unit consists of Blower, coupling, protective cover and anchor bolts. Special accessories (Filter, Silencer, etc.) are prepared according to specific process requirements.

Performance Range:

Flow Capacity: $20 \text{ m}^3/\text{min}$ to $800 \text{ m}^3/\text{min}$

Outlet Pressure: $0.2 \text{ kgf/cm}^2 \sim 1 \text{ kgf/cm}^2$

Application Areas include Water Treatment, Waste Water Treatment, Biogas Recovery, Vacuum Cleaning, Air Knife Drying, Flotation & Mineral Beneficiation, Galvanization Process & Electroplating, Fluid & Piscina Oxygenation, Process Gas Conveying, Paper Making & Printing, & Air Firing (Desulphurization, Carbon Black, Blast Furnace Process etc.).

Please contact Everest for further details.

HOW TO USE PERFORMANCE CHART

STP Condition : Temp. 20°C, Pressure 1013mbar or 14.7 PSIA, RH50%
(as per ISO 2011:2002)

NTP Condition : Temp. is 0°C & all others same

You can directly select the blower by checking the pressure at Top row and RPM at side column in performance Table

Vacuum Conversion : Absolute pressure p (mbar abs.) can be converted to & from pressure difference DP (inches Hg) based on atmospheric pressure of 1013 mbar abs. (= 760 Torr = 29.92 inches Hg abs.) using the following formula : $29.92 - 2.953 \times 10^{-2} X p$ (mbar abs) = DP (inches Hg); $1013 - 33.86 \times Dp$ (inches Hg) = p (mbar abs.)

SCOPE OF SUPPLY (TWIN LOBE & TRILOBE ROOTS AIR BLOWERS)

A) Bare Blower:

1. Blower; 2. Suction & Discharge ICP/Companion Flanges; 3. Blower Pulley

B) Blower With Standard Accessories (Pressure Duty) Including Water Cooled Blowers:

1. Blower; 2. Common Motor & Blower Base Frame with Motor Rails & Belt Tightening Arrangement; 3. Belt Guard / Coupling Guard; 4. Suction Air Filter; 5. Suction Silencer; 6. Pressure Gauge; 7. Safety Relief Valve (Spring Loaded Type); 8. Pulleys & Vee Belts / Coupling; 9. Foundation Bolts; 10. Interconnecting Pipe with Companion Flange; 11. O&M Manual

C) Additional Accessories (Available As Per Requirements):

1. NRV; 2. V-Belt; 3. Discharge Silencer; 4. Anti Vibration Pad; 5. Motor; 6. Differential Pressure Gauge Across Filter; 7. Temp. Gauge; 8. Special Paint; 9. Inspection; 10. Packing

D) Blower with Standard Accessories (Vacuum Duty):

1. Blower; 2. Common Motor & Blower Base Frame with Motor Rails & Belt Tightening Arrangement ; 3. Belt Guard / Coupling Guard; 4. Discharge Silencer; 5. Vacuum Gauge ; 6. Vacuum Relief Valve (Spring Loaded Type); 7. Pulleys & Vee Belts / Coupling; 8. Foundation Bolts; 9. Interconnecting Pipe with Companion Flange; 10. O&M Manual

E) Blower with Standard Accessories (Gas Duty):

1. Blower; 2. Common Motor & Blower Base Frame with Motor Rails & Belt Tightening Arrangement

Due to constant improvements, technical specifications are subject to change without notice. For further clarifications, contact our technical team who shall be glad to assist you to overcome application related problems.

SPARES & ACCESSORIES

100% inhouse manufacturing.

Buy only GENUINE Everest Products.

Retain your advantage with factory genuine replacement parts & accessories. All parts meet original manufacturing specifications and tolerances for guaranteed fit and function. Pre-packaged overall kits with detailed service manuals are available on request.

FEATURES

- Readily available
- Fast delivery
- Guaranteed fit and function
- Service kits for routine product maintenance

SPARES

Bearings, Oil Seals, Gears, Rotors, Spacer Bushes, Blower lubricant, Gaskets, Piston Rings, Body, Plate

ACCESSORIES

Safety Relief Valves, Filters, Suction Silencers, Discharge Silencers, Pulleys, Vee Belts, Hubs, Drive couplings, Pressure Gauge, Vacuum Gauge, Non Return Valves, Base Frame, Beltguard

Due to constant improvements, technical specifications are subject to change without notice. For further clarifications, contact our technical team who shall be glad to assist you to overcome application related problems.

WE ARE BIGGEST ROOTS BLOWER MANUFACTURERS IN INDIA

- **Leading By Innovation**
- **Technically Stronger**
- **Physically More Connected**
- **Ready to take INDIA Global**
