

Factory Certified Service & Parts for
Blowers, Vacuum Pumps & Centrifugal Compressors

ROOTS® Protection PLAN

Maximize Uptime. Minimize Downtime.
Ensure Peak Performance.

ROOTS® Protection PLAN Blueprint

Keep your blower systems operating at peak efficiency with ROOTS Protection PLAN—our comprehensive suite of maintenance and service solutions designed to optimize performance, extend equipment life, and reduce unplanned downtime. Whether you manage a single unit or a fleet of systems, our proactive approach ensures your operations stay ahead of costly breakdowns. With expert technicians and genuine OEM parts, you can count on consistent performance and long-term reliability.

Why Choose ROOTS Protection PLAN?

Priority Technical Customer Support

Enjoy faster response times, streamlined service scheduling, and priority access to technical support, helping you maintain uptime and productivity when it matters most. This ensures that critical issues are resolved swiftly, minimizing disruptions to your operations. With dedicated support, you can focus on your core business while we handle the technical details.

Predictable Maintenance Costs

Our tailored plans help you avoid costly surprise and manage your maintenance budget more effectively. By planning ahead, you can allocate resources where they matter most — keeping your operations running smoothly. This financial clarity allows for smarter long-term decision-making and reduces the stress of unexpected repairs or emergency service calls.

Extended Equipment Lifespan

Protect your investment with proactive care that helps prevent wear, corrosion, and avoidable failures. By staying ahead of issues with expert maintenance and strategic system upgrades, you'll get the most from your equipment, year after year. Routine checkups also help optimize performance, reducing the risk of costly breakdowns and extending component life.

Enhanced Equipment Reliability

Prevent unplanned downtime with regularly scheduled inspections, precision lubrication, and timely part replacements. Our factory-trained technicians use data-driven insights and OEM-quality standards to ensure your equipment operates at peak performance, day in and day out. This proactive approach minimizes the risk of sudden failures and helps maintain consistent output and operational efficiency.

Extensive Service Offerings

Preventive Maintenance

Scheduled services including lubrication, inspections, and system monitoring to maintain optimal performance. These regular checkups help detect wear and tear early, preventing minor issues from becoming major failures. Our customized maintenance intervals are tailored to your system's operating conditions for maximum efficiency.

Predictive Maintenance

Advanced diagnostics to identify potential issues before they become problems, utilizing vibration, temperature, and pressure monitoring. By analyzing data trends, we can schedule service at the most convenient time for your operation while keeping your systems at peak performance. This data-driven approach helps reduce costly emergency repairs and extends equipment life.

Rapid Emergency Response

Rapid on-site support and exchange programs to address urgent issues and minimize downtime. Our technicians are equipped to respond quickly with the tools and parts needed to get your process back up and running fast. With priority access for service plan members, you'll have peace of mind knowing help is just a call away.

Genuine OEM Parts & Service

Our service centers are staffed with factory-trained technicians who use only genuine ROOTS® parts, ensuring quality and compatibility. With locations in Connersville, Indiana, and Houston, Texas, we provide reliable support wherever you operate. Every component is engineered to meet exact specifications, helping maintain peak performance and safety standards. Trust ROOTS expertise to keep your system running like new, year after year.

Track Your Equipment Health with Our Comprehensive Service Report

At the conclusion of the service detailed above, the customer will be provided with a comprehensive report complete with vibration data and recommendations. If any additional parts are identified as problematic, their replacement will be offered at a 15% Protection PLAN discount.

If the blower is in or is restored to a warrantable condition and routine maintenance is performed, a one-year Limited ROOTS Factory Warranty will be applied to the blower. See Program details. This partnership program between ROOTS and the owner requires periodic maintenance by the operator in accordance with the O&M manual. This service is offered in accordance with our standard Terms & Conditions attached.
