

SEEPEX.

An Ingersoll Rand Business

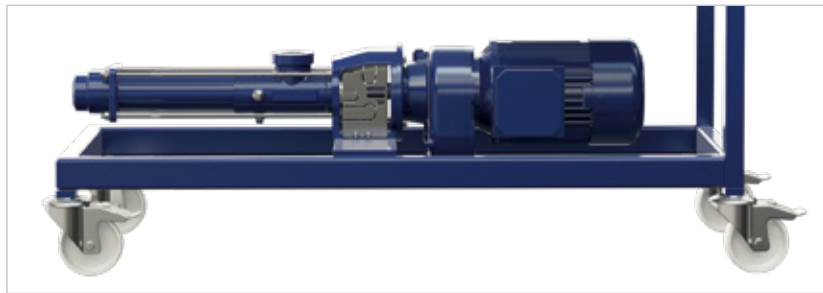

**READY TO PUMP.
READY TO MOVE.
FLEXSKID**

FSD

FASTER IMPLEMENTATION.

Standardized pump packages for faster deployment and reduced project complexity. Flexibility where it matters most: in your process, your project and your application.

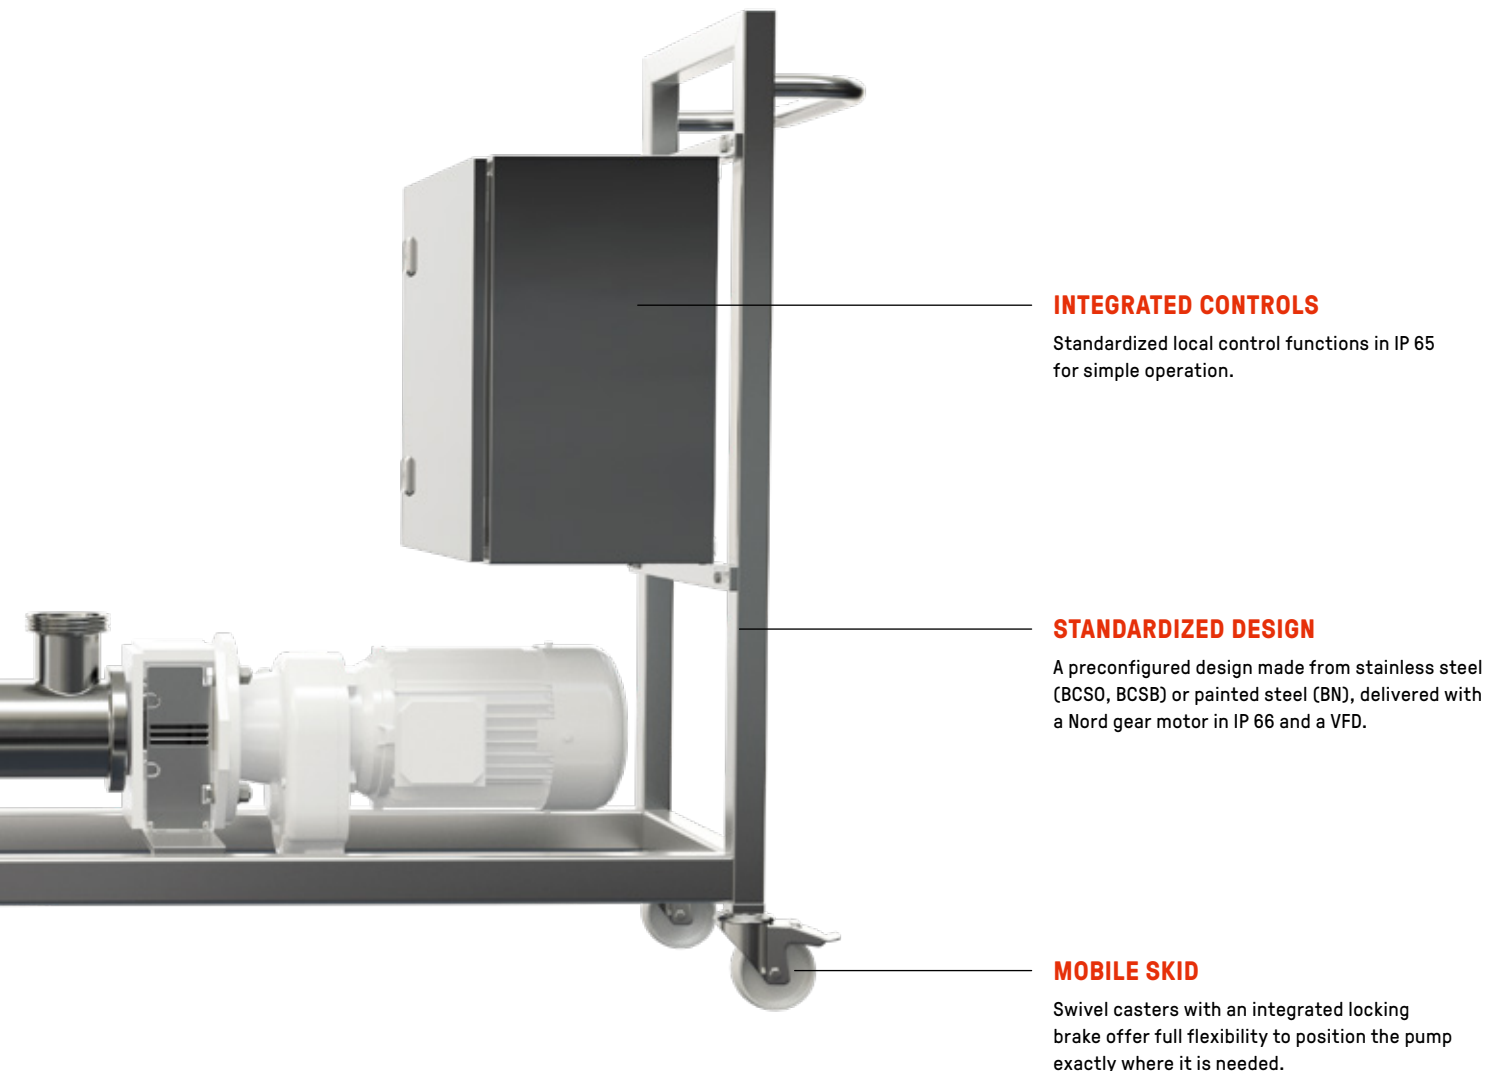

PC PUMP

Proven SEEPEX progressive cavity pump technology for reliable pumping performance and long service life. Available with BCSO and BCSB pumps for hygienic applications or BN pumps for industrial applications.

Industrial processes require pumping solutions that are reliable, efficient and accessible. FlexSkid combines proven SEEPEX pump technology, integrated controls and a standardized skid concept in one complete solution. Designed for faster project execution, reduced engineering effort and predictable delivery times, FlexSkid provides a practical alternative to fully customized skid projects.

By combining standardization with proven SEEPEX quality, FlexSkid helps customers accelerate implementation, simplify procurement and focus on their core process requirements.

WHY FLEXSKID?

ONE SUPPLIER FOR EVERYTHING

Pump, controls and skid from a single source.

PROVEN SEEPEX QUALITY

Built around trusted SEEPEX pump technology.

FLEXIBILITY WHERE IT MATTERS

The mobile skid concept provides flexibility within production processes, while the standardized design helps customers remain flexible in project planning and implementation.

PREDICTABLE DELIVERY TIMES

Standardization enables reliable planning and faster project execution.

REDUCED ENGINEERING EFFORT

A clearly defined standard concept reduces project complexity and minimizes engineering resources.

NEED MORE THAN THE STANDARD?

FlexSkid is designed for many standard pumping applications. For additional instrumentation, advanced controls, alternative materials or customer-specific requirements, SEEPEX also provides fully engineered skid solutions tailored to your exact process needs.

APPLICATIONS

HYGIENIC APPLICATIONS

FlexSkid with BCSO and BCSB pumps supports hygienic pumping applications and production processes requiring high standards of cleanliness and reliability.

- Food & Beverage
 - Food Waste
-

INDUSTRIAL APPLICATIONS

FlexSkid with BN pumps provides a standardized solution for a wide range of industrial pumping applications.

- Chemical Processing
- Water & Wastewater
- Pulp & Paper
- General Industries

BENEFITS

- One supplier, one responsibility
- Reduced engineering effort
- Predictable delivery times
- Faster project execution
- Mobile skid concept
- Flexibility where it matters
- Proven SEEPEX quality

KEY FACTS

- Conveying capacity:
0.03–500 m³/h (0.132–2,200 USGPM)
- Pressure:
up to 48 bar (700 psi)
