APPENDIX B SRP SERVICE AREA MAP	B-1

1.1 WELCOME TO THE SRP ENERGY EFFICIENCY ALLIANCE

Welcome! We are pleased that you are interested in joining the SRP / EEA team. As an SRP Energy Efficiency Alliance (EEA, or Alliance) member, you have the opportunity to grow your business through your association with SRP. EEA members can list their company on the SRP search tool, participate in training opportunities, have a dedicated outreach member assigned to you, and more. Plus, EEA membership provides a contractor with the “power of legitimacy” as a vetted energy professional in the SRP service territory.

SRP’s objective through the Alliance is to support our members’ efforts to further our customers’ energy efficiency while providing training and rebate application support to help members succeed and grow their business. Our goal is to enable EEA members to provide the best products and services to our customers, SRP’s energy users. The EEA program values EEA member contributions, and we look forward to working with you as a trade ally partner. Thank you for participating!

2.1 BENEFITS

Measures in the SRP *Standard and Custom Business Solutions* programs do not require installation by an SRP-approved Energy Efficiency Alliance (EEA, or Alliance) member. However, an approved EEA member will benefit from several advantages that a non-participating contractor will not have access to, including:

SRP Energy Efficiency Alliance Information Displayed on Search Tool

- As a member of the Energy Efficiency Alliance, you have the opportunity to be listed on the [SRP “Find-A-Trade Ally”](#) customer search tool if your company is in good standing and offers services to SRP customers. EEA members can keep their information up-to-date with the SRP Trade Ally Connect portal.

SRP Business Solutions Contractor Incentives or “SPIFF”

- SRP Alliance Participants are eligible to receive a contractor incentive or spiff for eligible projects submitted to the SRP Standard Business Solutions and Custom Business rebate program if they have a valid W-9 on file and are identified as the contractor or QSP. The rebate depends on the timeliness of the submission and other factors. The contractor incentive depends on several factors and ranges between 5–10% of the customer’s rebate. Projects purchased and installed after May 1, 2025, could still be eligible for a contractor incentive until October 31, 2025. Talk to a program representative to learn more.

SRP Business Solutions Third-Party Rebate Assignment

- The customer may authorize SRP to issue the rebate payment to the Energy Efficiency Alliance member who submits the project. The customer must complete the “Payment Assignment” form in the rebate application. The option to assignment payment to a third party is only available to EEA Members in good standing. This assignment allows you to reduce the invoice to the customer by taking the rebate on their behalf.

SRP Business Solutions Program Rebates

- Many SRP programs feature rebates that defray the installation cost of energy-efficient equipment and materials. This rebate reduces upfront costs, shortens project payback, and helps you close sales.

As an EEA member, the process for applying for rebates is reviewed with your company. EEA members have access to group and individual mentoring sessions that walk you through using the incentive application tools, helping you become an expert in simplifying the rebate process for the customer. These tools prepare you to guide the customer through the energy efficiency decision and help close sales.

SRP Program Materials and Collateral

- SRP has designed numerous program pieces that inform customers about energy-efficient equipment eligible for rebates. From fact sheets to case studies, SRP provides EEA members access to this collateral – all you have to do is ask! SRP has even placed customer testimonials on the webpage, easily accessible by EEA members for use in any customer meeting.

Valuable Resources Via www.savewithsrpbiz.com

- Providing businesses with access to information that EEA members can leverage to assist customers. The following topics are covered:
 - Rebates and incentives hotlinks that connect EEA members to information on specific rebate programs
 - Online energy tools include:

- Online submission portal to make submitting applications easier.
- Trade Ally Connect portal makes it easy to stay up-to-date on the program and keep company information accurate so customers can find you.
- Energy advice link, where EEA members can connect the customer to an on-line guide for saving energy, link to Energy Star and other industry-specific webpages, and walk the customer through signing up for a quarterly newsletter.
- Lighting application: access the most up-to-date version of the excel-based lighting workbook.
- Non-lighting application: access the most up-to-date version of the excel-based application that covers all measures that are not lighting measures.
- Customer Video testimonials.... and so much more!

Education and Training

- EEA members have the opportunity to participate in training designed to increase both technical and sales expertise, specifically related to the rebate programs. SRP's training includes, but is not limited to, equipment eligibility, rebate amounts, the application process, and the anticipated customer energy and cost savings associated with qualifying high-efficiency equipment.

Notification of Program Updates

- EEA members will receive advance notice of events, updates, and promotions to the *SRP Business Solutions* portfolio of programs through email and quarterly newsletters for EEA members only.

Newsletters

- Information regarding energy-efficient technologies, program updates, project recognition, and tips for successful energy efficiency projects is distributed via electronic newsletters to EEA members.

3.1 EXPECTATIONS OF ALLIANCE PARTICIPANTS

SRP retains the right to require that EEA members renew membership or reapply for membership annually. Existing EEA members will receive information and instructions for renewal in advance of renewal deadlines. Ongoing EEA membership will depend on your company meeting the requirements defined in this manual and the *Energy Efficiency Alliance Application and Participation Agreement*.

EEA Members Are Expected To:

- Maintain positive customer reviews, including a satisfactory resolution to customer complaints
- Attend the Annual Kickoff meeting and stay up to date on program information.
- Offer accurate program information to customers
- Assist customers with the application process
 - Submit complete and accurate applications
 - Provide required supporting documents, marked as necessary to identify and match products to workbooks and rebate applications including, but not limited to, a customer's W-9 form.
 - Ensure that all customer information fields are accurate and complete
 - Respond to requests for clarification and additional information in support of applications promptly
- Adhere to all permitting and licensing requirements
- Conduct honest and ethical business practices, including:
 - Avoiding conflicts of interest
 - Fulfilling all contractual obligations
 - Refraining from submitting fraudulent or inaccurate information
 - Maintaining strict confidence in the SRP's customer information
 - Accurately representing programs to customers / other parties
 - Accurately providing information to SRP
- Keep relevant records and documentation
- Follow marketing and branding guidelines as provided in the **Marketing Guidelines** section

EEA Performance Standards

- An approved EEA member is required to:
 - Act with integrity, and as such do not disparage other EEA members to the customer (verbally, in writing, etc.);
 - Treat customers participating in the SRP rebate programs fairly and respectfully, delivering services on time and as promised;
 - Act with honesty, making no false claims about savings, equipment performance, or engage in conduct that would be construed as fraudulent or deceitful;
 - Appropriately represent the EEA member company's relationship with SRP as an independent contractor;

- Display professionalism in its conduct, treating customers with respect;
- Utilize subcontractors that add value to the SRP rebate program, its business, and image and not utilize subcontractors that have been suspended or terminated from an SRP program.

EEA members that are out of compliance with the EEA membership requirements or the Trade Ally Performance Standards (noted above) may be subject to probation, suspension, or removal from the program.

4.1 REBATE APPLICATIONS

- Send all rebate applications and responses to requests for additional information to the savewithsrpbiz@srpnet.com email address – this mailbox is monitored by multiple processors and will ensure a fast response time.
- All rebate applications must include the SRP customer's W-9 tax form.
- Take advantage of the SRP Rebate Center online portal. Apply an on-line uploading system with many advantages beyond email.
- Send only the pages that are needed for supporting documentation
- To ensure that emails are not kicked back, limit the total attached file size to 10MB per email
- If you need to split up the email due to the 10MB size constraint, be sure to link multiple emails together in the subject line (e.g., "Part 1 of 2," "Part 2 of 2")
- Use this subject line format for Pre-Approval Applications: New Project - [insert Customer Name]
- Use this subject line format for Final Applications: SRP Final - [insert project ID - insert customer name]
- A tracking number will be issued for each project - use that tracking number in all communications regarding specific projects.

Tip: Refrain from sending the submittal rebate applications directly to outreach staff – the mobile nature of our business has the outreach team constantly on the move. We'd hate for a rebate to sit in an inbox when someone is out of the office whether it's 4 hours or 4 days. The processing team is staffed daily, with the primary function of processing rebates for SRP. Feel free to reach out to your outreach representative to review your preliminary application before submittal to ensure it includes all necessary documentation. However, the outreach team cannot submit rebate documentation on your or the customer's behalf.

4.2 INQUIRIES

EEA members are encouraged to contact an EEA program outreach representative with any questions or concerns. EEA members can also contact: eea@srp.resource-innovationsservices.com

4.3 CUSTOMER COMPLAINTS

Notify an EEA program outreach representative right away should there be any customer complaints about a project receiving a rebate.

4.4 CUSTOMER MEDIATION

From time-to-time customers contact SRP with complaints. If this occurs, the EEA program will contact the EEA member to collaborate and work to resolve the situation.

5.1 PROGRAM/TOOL TRAINING

Program, process, and tool training are offered to all EEA members, and approved EEA members are expected to participate in these training sessions.

5.2 APPLICATION REVIEW

Incomplete project applications will be rejected and returned to the submitting EEA member for completion. All projects receive a desk QA/QC verification to ensure customer and measure eligibility, accurate savings and rebate levels. Rebate program staff will contact the EEA member via phone or email to request additional/clarifying information if clarifications are required.

5.3 PRE-INSTALLATION INSPECTIONS

Small Business, Custom, and even Standard Business projects may be selected for pre-inspection before approval is given to install equipment. When a project submitted by an EEA member is chosen for inspection, rebate program staff will notify the EEA member. EEA members placed on probation by the program due to quality issues can be required to submit pre-installation applications for pre-approval and pre-installation inspections on all projects (including non-lighting retrofit projects) at the program administrator's discretion.

5.4 POST-INSTALLATION INSPECTIONS

Completed projects are subject to a post-installation inspection and are selected on a random basis. Typically, this involves inspecting a representative sample of all qualifying measures. If a project fails post-installation inspection, additional inspections will be conducted to ensure all measures are installed as per the rebate application documentation. There may be cases where the final incentive application and subsequent rebate amount are modified (increased or decreased).

Promotional material and collateral is provided to EEA members so that members may provide accurate and timely program material to customers, and allow EEA members to maximize their affiliation with SRP. Clear direction is provided below on what an EEA member can and cannot say, write or promote about SRP. These guidelines are intended to help EEA members accurately promote their association with the SRP rebate programs.

EEA members that do not follow the promotional guidelines may be removed from the network.

EEA Members May:

- Tell customers that you are an “SRP Energy Efficiency Alliance (EEA) participant.”
- Use the branded materials available to you from SRP, such as program brochures, fact sheets and case studies.
- Use links and URLs to link to SRP collateral on EEA member company webpages.
 - Participate in SRPs (program name) and you may be eligible for rebates. Call 602-236-3054 or visit www.savewithsrpbiz.com for program information.
- Use either of the following approved messages on the EEA member’s website and printed collateral, including business cards, to promote EEA member status:
 - (*company name*) is an SRP Energy Efficiency Alliance participant
 - SRP Energy Efficiency Alliance participant

EEA Members May Not:

- Represent yourself as SRP, a subcontractor of SRP, or state that you are calling on behalf of SRP.
- Although you may use the approved language described above, you may not use the SRP logo and energy efficiency program **logos** on any materials you create. Utility and energy efficiency program logos are not to be used on company business cards, invoices, brochures, advertising, clothing, website, presentations, slides or any other communications material.
- Mention the rebate amount in any marketing materials.

Is there a maximum or minimum rebate amount that I can receive from this program?

Customers are subject to a maximum rebate of \$450,000 from May 1 through April 30 for all SRP programs, with separate program area caps of \$300,000 for Energy Efficiency programs, \$300,000 for Business EV programs, and \$100,000 for Beneficial Electrification programs. Program or technology-based limits may also be applicable, based on program terms and conditions. SRP reserves the right to determine at their sole discretion the program year to which a rebate is attributed.

There is a \$50 minimum non-lighting rebate amount and a \$100 minimum lighting rebate amount required for participation in SRP Business Solutions Standard Business Program.

What's the benefit to SRP of having an Energy Efficiency Alliance network?

SRP will build relationships with trade allies that result in increased sales of high-efficiency equipment and services to their customers; translating to high customer satisfaction and increased energy savings for their programs.

Will SRP recommend EEA members to their customers?

No. However, SRP and Resource Innovations will direct customers to the listing of EEA members on the SRP website.

Do I need to be in the EEA network to help my clients receive rebates?

No, participation in the EEA network is optional. We want to point out that companies that choose to participate in the network will have special access to resources that will not be available to all.

If I have any additional questions, who can I contact?

Resource Innovations, SRP's program implementation contractor for the trade ally program, will respond to any questions or concerns you may have.

Will SRP provide any customer information to participants in the EEA Network?

No, customer information will not be provided by SRP to trade allies

Can you show me some examples of how you have helped other EEA members?

SRP has provided both hard copy case studies, and on-line video testimonials that illustrate how SRP and participating trade allies have successfully helped customers select and install high-efficiency equipment. We are always looking for success stories and projects to highlight as case studies!

SRP will distribute program updates, code changes, technical articles, event invitations, and even feature trade ally success stories – via newsletters and e-blasts to the EEA network.

Is payment required to enroll in the EEA network?

There is no payment to enroll in the network. Please work with one of our outreach staff to fully understand what program participation will mean to your business.

Can I use the SRP logo (pulled from the website or otherwise) on my marketing and advertising material?

No, the SRP logo is property of SRP and use of the logo is not permitted.

If a contractor (that is not an EEA participant) helps a customer apply for a rebate, will they automatically be signed up for this program?

No.

Will I have to renew my membership in the EEA network annually?

SRP may require that alliance members renew or reapply for membership annually. Existing members will receive information and instructions for renewal in advance of renewal deadlines. All members are required to attend the live kickoff event, or if unable to attend the kickoff other alternatives will be offered like onboarding training session afterward. Information will be provided to those that miss but all EEA members are strongly encouraged to attend the kickoff event.

Is it better to have one person as our company's "key contact"?

We do need one primary contact to ensure all information is directed to the appropriate person responsible for the Company's contact with the SRP Business Solutions Program Team. We don't mind multiple contacts; we encourage it! We understand that you are busy running your business, and we want to make certain that any program updates, newsletters, or other mailings are shared within your company as soon as possible.

My company has multiple offices/branches; do we need to enroll each?

Yes. You have different contacts at each location, and likely are operating under different contractor licenses.

Appendix B

SRP Service Area Map

An illustration of SRP's service area is provided below. A more detailed map of SRP service area is available by contacting the Program Administrator.
