LIQUITRON™ 7000 Series Multi-Parameter Controller

Water treatment just got easier with the new LIQUITRON™ 7000 Series controller. When paired with your LMI metering pump, the controller’s 7 inch (17.8 cm) full-color touchscreen and intuitive user interface provides seamless setup and operation. This single controller combines all the application functionality of the four LIQUITRON standard controllers: DC4000, DC4500, DR5000, and DP5000. The LIQUITRON 7000 Series is fully equipped and ready to control your boiler, cooling tower, pH, and ORP applications out of the box.

Setup Wizard

The Setup Wizard simplifies installation with step-by-step configurations for common applications.

Operating Dashboard

See status at a glance and tap into process data to optimize system health.

The LIQUITRON 7500 Model is equipped with an embedded 4G/LTE cellular modem for connection to LMI Connect, Smart Monitoring Service. Remotely monitor and access your process via the LMI web portal or using iOS and Android apps. LMI Connect shows real-time status, notifies users of any alerts that may require attention, and automates custom system reports to help manage applications.

Robust Construction

The sturdy IP55/NEMA 3R enclosure is suitable for indoor and outdoor installations.

Optional Pre-Engineered Panels

Simplify your installation process with ready-to-mount pre-engineered panels available through local distribution.

LMI ConnectSM

smart monitoring service

LMI Connect, Smart Monitoring Service, allows real-time remote system access from desktop or mobile device. Ask your local distributor about activation details and a FREE 90-day trial to give you complete remote access anytime from anywhere.

Choosing the right controller for your application has never been easier.

Now more than ever, you can rely on LMI.

Ingersoll Rand (NYSE:IR) advances the quality of life by creating comfortable, sustainable and efficient environments.
